Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Lead Manager have appointed Beeline Broking Limited as Designated Market maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

- 8. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.**

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

- 9. Competition may affect market share or profitability which could have an adverse effect on our business, financial condition and revenues.**

In this digital era the competition from organized and un- organized sectors, organized sector may offer heavy discount to the big client and un-organized sector. The unorganized sector may offered Chemicals and Adhesives at very low price as their administrative cost is very less as compared to organized sector.

10. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the issue price and you may not be able to sell your Equity Shares at or above the Issue Price*

The Issue Price of our Equity Shares has been determined by fixed price method. This price is be based on numerous factors (For further information, please refer chapter titled “Basis for Issue Price” beginning on page 65 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;*
- Changes in revenue or earnings estimates or publication of research reports by analysts; Speculation in the press or investment community;*
- General market conditions; and*
- Domestic and international economic, legal and regulatory factors unrelated to our performance*

11. *There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholder’s ability to sell, or the price at which it can sell, Equity Shares at a particular point in time*

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time, and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time

12. *Civil unrest, acts of violence including terrorism or war involving India and other countries could materially and adversely affect the financial markets and our business.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Terrorist attacks and other acts of violence may adversely affect the Indian stock markets, where our Equity Shares will trade, and the global equity markets generally.

13. *The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Indian GAAP.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for the adoption of, and convergence with, IFRS announced by the Ministry of Corporate Affairs, GoI (MCA), through a press note dated January 22, 2010. The MCA through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues including tax-related issues are resolved. The MCA is expected to announce the date of implementation of the converged accounting standards at a later date. Our financial

condition, results of operations, cash flows or changes in shareholders equity may appear materially different under IFRS than under Indian GAAP. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding period in the comparative fiscal year/period. In addition, in our transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, our transition may be hampered by increasing competition and increased costs for the relatively small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements.

14. Economic developments and volatility in securities markets in other countries may cause the price of the Equity Shares to decline.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investor's reactions to developments in one country may have adverse effects on the market price of securities of companies situated in other countries, including India. For instance, the recent financial crisis in the United States and European countries lead to a global financial and economic crisis that adversely affected the market prices in the securities markets around the world, including Indian securities markets. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

15. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. To ensure compliance with the requirements of the Companies Act, 2013, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention.

16. Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- central and state sales tax, value added tax and other levies; and
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;*
- central and state sales tax, value added tax and other levies; and*
- Other new or special taxes and surcharges introduced on a permanent or temporary basis from time to time.*

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition

17. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular

18. The nationalized goods and services tax (GST) regimes proposed by the Government of India may have material impact on our operations

The Government of India has proposed a comprehensive national goods and service tax (GST) regime that will combine taxes and levies by the Central and State Governments into a unified rate structure. Given the limited liability of information in the public domain covering the GST we are unable to provide/ measure the impact this tax regime may have on our operations

19. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and trading industry contained in the Prospectus

While facts and other statistics in the Prospectus relating to India, the Indian economy and the transformers, cables and wire industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Our Industry" beginning on page 73 of the Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere

20. Conditions in the Indian securities market may affect the price or liquidity of our Equity Shares

The Indian securities markets are smaller than securities markets in more developed economies and the regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in the more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. Further, the Indian stock exchanges have experienced volatility in the recent times. The Indian stock exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian

companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading and limited price movements. A closure of, or trading stoppage on the SME Platform of BSE could adversely affect the trading price of the Equity Shares

21. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic, social and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices

22. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all

23. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition

24. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares

25. Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

SECTION III : INTRODUCTION

SUMMARY OF OUR INDUSTRY

GLOBAL SCENARIO

Global economic activity and trade picked up modestly from the later part of 2016. The firming up of commodity prices led to some uptick in inflation in major advanced economies (AEs). Recessional conditions ebbed in key commodity exporting emerging market economies (EMEs), setting the stage for a turnaround in EMEs as a group.

Since the Monetary Policy Report (MPR) of October 2016, global growth picked up modestly towards end-2016, and is projected to improve further in 2017 by multilateral agencies. Growth in EMEs moderated in 2016, but is set to improve with the ebbing of recessionary conditions in key commodity exporting countries. Even though world trade appeared to have emerged out of a trough, new risks have emerged from an increasing tendency towards protectionist policies and heightened political tensions. Commodity prices have risen since late 2016 on improvement in US economic indicators such as strong labour market and consumer spending; infrastructure spending in China; and geopolitical concerns. Crude oil prices firmed after the OPEC announced curtailment of production. Inflation edged up on expectations of reflationary fiscal policies in the US, rising energy prices and a mild strengthening of demand.

OVERVIEW OF INDIAN ECONOMY

The Indian economy has emerged as a bright spot in the world economy, becoming one of the fastest growing large economies in the world. The 7.6 per cent growth in the GDP at constant market prices in 2015-16, according to the advanced estimates of the Central Statistics Office, compares favourably with growth in the previous three years; 7.2 per cent in 2014-15, 6.6 per cent in 2013-14 and 5.6 per cent in 2012-13. It is noteworthy that this growth is estimated to be achieved despite subdued global demand that dampened India's exports significantly, and two consecutive below-normal monsoons that impacted farm output and productivity.

Industry and Services

The performance of key industrial sectors based on the Index of Industrial Production (IIP) reveals a pickup in industrial production in first three quarters of 2015-16. Growth in IIP in April-December 2015 was 3.1 per cent, higher as compared to 2.6 per cent in same time period last year. As per the sectoral classification of IIP, electricity sector grew by 4.5 per cent, manufacturing by 3.1 per cent and mining by 2.3 per cent during April-December 2015-16. The factors constraining further growth acceleration in manufacturing sector include; infrastructure bottlenecks and low external demand. Among the use-based categories, consumer durables witnessed marked improvement in growth during April- December 2015-16.

Banking Sector and Financial Inclusion

There was considerable increase in the number of basic savings bank deposit accounts (BSBDAs) during the current year under the Pradhan Mantri Jan Dhan Yojana. BSBDAs reached 441 million at end- September 2015, as against 398 million at end-March 2015. The total number of banking outlets increased from 553,713 at the end-March 2015 to 567,530 at end-September 2015. Three schemes were launched in 2015 in the insurance and pension sectors for creating a universal social security system for all Indians, especially the poor and underprivileged. The schemes include; the Pradhan Mantri Suraksha Bima Yojana, the Pradhan Mantri Jeevan Jyoti Bima Yojana and the Atal Pension Yojana.

INDIAN IT INDUSTRY

India is considered as a pioneer in software development and a favorite destination for IT-enabled services. The Indian IT-BPO sector including the domestic and exports segments continue to grow from strength to strength, witnessing high levels of activity both onshore as well as offshore. The companies continue to move up the value-chain to offer higher end research and analytics services to their clients. India's leadership position in the global IT and BPO industries are based primarily on the following advantages. It has a rapidly growing urban infrastructure fostering several IT centres in the country. Offshore service centres are spawning in the country due to operational excellence with low delivery cost, quality leadership and a conducive business environment. Favorable policy interventions, enabling infrastructure and augmenting a wide skill base from the government has further enhanced India's brand image.

However, there is a real need to measure the digital divide in the country, including the urban-rural and gender divides, and the use of community Internet access centers by low-income users.

Overall position in the country as on 31.03.2015 is given below:-

Internet / Broadband Subscribers (As on 31.03.2015)	
Total Internet Subscribers	302.35 Million
Narrowband subscribers	203.15 Million
Broadband subscribers	99.20 Million
Wired Internet Subscribers	19.07 Million
Wireless Internet Subscribers	283.29 Million
Total Internet Subscribers per 100 population	24.09

It is also worth mentioning have that private sector has contributed significantly towards encouraging better telecom connectivity. The share of private sector which was just 35.44% in 2003 tended to increase to 90.5% in

2014. Private Sector plays a predominant role in wireless telecom sector, while Public sector PSUs are the major players in wire line sector, as per Telephone Regulatory Authority of India.

Information and Communication Technology (ICT) access and use are unequally distributed across countries, as clear from UNDP report on MDG, s 2015.

The Indian software and services exports including ITES/BPO are estimated at US\$ 98.1 billion in year 2014-15 as compared to US\$87.3 billion in year 2013-14, a 12.4% growth in dollar terms. (Rs.612144 Crores in 2014-15 as compared to Rs.527292 Crores in 2013-14 with a growth of 16.09%).

IT Services is the fastest growing segment within the Indian IT-ITES sector. Certain data, in particular, data on the telecommunication sector, the IT industry and business process outsourcing (BPO) and data on the information society at large, are produced on a regular basis. A significant amount of data exists on the IT service industry, collected by National Association of Software and Services Companies (NASSCOM), reflecting their members' data. In India, the indicators related to workforce, value added, imports & exports respectively are not strictly measured as per the International Standard Industrial

Classification (ISIC). However, the information related to workforce & exports for this sector is maintained in National Association of Software and Services Companies (NASSCOM) for the IT-BPO sector. Similarly, data on IT manufacturing is captured by another private body, the Communication and Manufacturing Association of India (CMAI).

GLOBAL SCENARIO

Global economic activity and trade picked up modestly from the later part of 2016. The firming up of commodity prices led to some uptick in inflation in major advanced economies (AEs). Recessionary conditions ebbed in key commodity exporting emerging market economies (EMEs), setting the stage for a turnaround in EMEs as a group.

Since the MPR of October 2016, global growth picked up modestly towards end-2016, and is projected to improve further in 2017 by multilateral agencies. Growth in EMEs moderated in 2016, but is set to improve with the ebbing of recessionary conditions in key commodity exporting countries. Even though world trade appeared to have emerged out of a trough, new risks have emerged from an increasing tendency towards protectionist policies and heightened political tensions. Commodity prices have risen since late 2016 on improvement in US economic indicators such as strong labour market and consumer spending; infrastructure spending in China; and geopolitical concerns. Crude oil prices firmed after the OPEC announced curtailment of production. Inflation edged up on expectations of reflationary fiscal policies in the US, rising energy prices and a mild strengthening of demand.

International financial markets were impacted by the US election results and expectations of monetary policy tightening by the Federal Reserve, underpinned by hawkish forward guidance. Financial markets in EMEs briefly turned volatile after the US election due to large capital outflows leading to plunges in currency and equity markets. Nevertheless, average volatility remained contained by historical standards since Q4:2016. Bond yields hardened across the globe in tandem with US yields, before softening somewhat since mid-March. Strengthening of the US economy further buoyed the equity markets, while the increasing likelihood of more rate hikes by the Federal Reserve in 2017 hardened bond yields in AEs. The US dollar appreciated to a multi-year high in December and remained bullish.

Gold prices fell significantly in Q4:2016. Expectations of an increase in fiscal spending in the US buoyed riskon sentiment, leading to a fall in safe haven demand in November. The increase in long-term yields following the rate hike by the Federal Reserve in December led to a further fall in demand for gold. In 2017 so far, gold prices have recovered somewhat on political uncertainties in the US and Europe.

With commodity and oil prices rebounding, spare capacity getting absorbed and inflation expectations firming up, there has been some uptick in inflation in major AEs in the recent period. Given the persisting economic slack, however, inflation remained below targets in most AEs. In the US, inflation sequentially accelerated in November and December to reach a level that was the highest since September 2014. However, core personal consumption expenditure (PCE) inflation remained stable at around 1.8 per cent during January and February 2017. Furthermore, 1-year USD inflation swap rate, which is an indicator of inflation expectations, has been stable since March 2017.

In a generally improving macroeconomic environment beginning in the second half of 2016, global financial markets were influenced by three events, viz., the US election, expectations and materialisation of the policy rate hike by the Federal Reserve, and uncertainty surrounding the Brexit roadmap.

Currency markets have been driven mainly by anticipation of policy initiatives by the new US administration and monetary policy stances in major AEs. The US dollar appreciated against most currencies beginning early November. It reached a 14-year high in December, before some reversal in Q1:2017 on uncertainty in realisation of Trump administration's policy initiatives and expectations of a slower pace of rate hikes by the Federal Reserve. The euro depreciated against the US dollar on political uncertainty. The pound was volatile against the US dollar – it gained during late November and early December on expectations of a favourable deal with the EU, but depreciated in January 2017 on resurfacing of uncertainty in the deal. The Japanese yen depreciated as yield spreads between Japan and the US/Euro area widened, before narrowing somewhat in Q1 of 2017.

To sum up, the modest turnaround in global recovery since the latter part of the previous year is projected to strengthen further. While AEs are likely to consolidate economic recovery, the ongoing slowdown in EMEs could reverse. Despite some firming up, inflation in AEs is expected to largely remain stable going by the 1-year inflation swap rate in the US. Economic activity and financial markets will continue to be impacted by political and policy uncertainties as well as monetary policy moves by major AEs.

OVERVIEW OF INDIAN ECONOMY

The Indian economy has emerged as a bright spot in the world economy, becoming one of the fastest growing large economies in the world. The 7.6 per cent growth in the GDP at constant market prices in 2015-16, according to the advanced estimates of the Central Statistics Office, compares favourably with growth in the previous three years; 7.2 per cent in 2014-15, 6.6 per cent in 2013-14 and 5.6 per cent in 2012-13. It is noteworthy that this growth is estimated to be achieved despite subdued global demand that dampened India's exports significantly, and two consecutive below-normal monsoons that impacted farm output and productivity.

GDP Growth

As per the Advanced Estimates released by the Central Statistics Office, the economy is estimated to grow at 7.6 per cent in 2015-16, higher than growth of 7.2 per cent achieved in 2014-15. The growth in agriculture, industry and services is estimated at 1.1 per cent, 7.3 per cent and 9.2 per cent in 2015-16 as opposed to (-) 0.2 per cent, 5.9 per cent and 10.3 per cent respectively in 2014-15. This shows a pick-up in industrial growth, driven by manufacturing which is estimated to grow at 9.5 per cent (in 2015-16), as compared to 5.5 per cent registered in 2014-15. The growth in agriculture remained low on account of second consecutive year of subdued monsoon. GDP growth during April-December 2015 (first 3 quarters) was 7.5 per cent, compared to 7.4 per cent in the same time period in 2014-15.

From the demand angle, the growth in private final consumption expenditure at 7.6 per cent in 2015-16 has been the major driver of growth. The growth of fixed investment improved from 4.9 per cent in 2014-15 to 5.3 per cent in 2015-16. The exports and imports are both estimated to decline by 6.3 per cent in 2015-16, the former mainly on account of subdued global demand and the latter largely reflecting the decline in international petroleum prices.

Industry and Services

The performance of key industrial sectors based on the Index of Industrial Production (IIP) reveals a pickup in industrial production in first three quarters of 2015-16. Growth in IIP in April-December 2015 was 3.1 per cent, higher as compared to 2.6 per cent in same time period last year. As per the sectoral classification of IIP, electricity sector grew by 4.5 per cent, manufacturing by 3.1 per cent and mining by 2.3 per cent during April- December 2015-16. The factors constraining further growth acceleration in manufacturing sector include; infrastructure bottlenecks and low external demand. Among the use-based categories, consumer durables witnessed marked improvement in growth during April- December 2015-16.

In 2015-16, as per the advance estimates, the services sector accounting for 53.3 per cent of India's gross value added at current basic prices, is estimated to grow at 9.2 per cent (at constant prices). Among the service sector activities, the sectors like: trade, hotels, transport, communication and services; and, financial, real estate and professional services are estimated to register robust growth rates in 2015-16.

Banking Sector and Financial Inclusion

There was considerable increase in the number of basic savings bank deposit accounts (BSBDAs) during the current year under the Pradhan Mantri Jan Dhan Yojana. BSBDAs reached 441 million at end- September 2015, as against 398 million at end-March 2015. The total number of banking outlets increased from 553,713 at the end-March 2015 to 567,530 at end-September 2015. Three schemes were launched in 2015 in the insurance and pension sectors for creating a universal social security system for all Indians, especially the poor and underprivileged. The schemes include; the Pradhan Mantri Suraksha Bima Yojana, the Pradhan Mantri Jeevan Jyoti Bima Yojana and the Atal Pension Yojana.

INDIAN IT INDUSTRY

In less than two decades, advances in information technologies have revolutionized government, scientific, educational, and commercial infrastructures. Powerful personal computers, high-bandwidth and wireless networking technologies, and the widespread use of the Internet have transformed stand-alone systems and predominantly closed networks into a virtually seamless fabric of interconnectivity. During this period, Indian IT industry has also built up an enormous confidence for itself in the global markets. The IT and IT enabled services (ITeS) sector are giving India the image of a young and resilient global knowledge power. The IT-ITeS industry has four major sub-components: IT services, business process outsourcing (BPO), engineering services and research and development (R&D), and software products.

India is considered as a pioneer in software development and a favorite destination for IT-enabled services. The Indian IT-BPO sector including the domestic and exports segments continue to grow from strength to strength, witnessing high levels of activity both onshore as well as offshore. The companies continue to move up the value-chain to offer higher end research and analytics services to their clients. India's leadership position in the global IT and BPO industries are based primarily on the following advantages. It has a rapidly growing urban infrastructure fostering several IT centres in the country. Offshore service centres are spawning in the country due to operational excellence with low delivery cost, quality leadership and a conducive business environment. Favorable policy interventions, enabling infrastructure and augmenting a wide skill base from the government has further enhanced India's brand image.

However, there is a real need to measure the digital divide in the country, including the urban-rural and gender divides, and the use of community Internet access centers by low-income users.

India's progress in Information and Communication Technology (ICT) related indicators:

Telephone lines and cellular subscribers

The Indian telecom with 946.4 million telephone connections, including 918.72 million wireless telephone connections as on 31.07.2014 is the second largest network in the world after China. Out of above 946.4 million telephone connections, only 40.57% were in rural areas where population is much more than in urban areas of the country. As regards wireless subscribers, rural areas accounted for 39.97% of total such connection in the country as on 31.07.2014.

Teledensity

Teledensity which means no. of telephones per 100 population is an important indicator of telecom penetration in the country. As on 31.07.2014, overall teledensity in the country was 76% as compared to 9.08% in the year 2005.

Overall position in the country as on 31.03.2015 is given below:-

Internet / Broadband Subscribers (As on 31.03.2015)	
Total Internet Subscribers	302.35 Million
Narrowband subscribers	203.15 Million
Broadband subscribers	99.20 Million
Wired Internet Subscribers	19.07 Million
Wireless Internet Subscribers	283.29 Million
Total Internet Subscribers per 100 population	24.09

It is also worth mentioning have that private sector has contributed significantly towards encouraging better telecom connectivity. The share of private sector which was just 35.44% in 2003 tended to increase to 90.5% in 2014. Private Sector plays a predominant role in wireless telecom sector, while Public sector PSUs are the major players in wire line sector, as per Telephone Regulatory Authority of India.

Information and Communication Technology (ICT) access and use are unequally distributed across countries, as clear from UNDP report on MDG, s 2015.

Number of Internet users per 100 inhabitants, 2000–2015

The information technology-information technology enabled services (IT-ITeS) industry has become one of the significant growth catalysts for India. India continues to maintain a leadership position in global sourcing, accounting for above 55

Per cent of the total global sourcing market (excluding engineering services and R&D) in 2014 as compared to 45 per cent in 2009. According to NASSCOM, during 2014, India's share in global IT services outsourcing and Business process management (BPM) has reached upto 67% and 38% respectively. The Indian information technology /Information technology Enabled services (IT/ITES) sector has registered tremendous growth over the past decade achieving a reputation for reliable and cost effective delivery of services. Today India is recognised as outsourcing destination of choice in the World.

ITES/BPO segment has been reinventing itself in the past few years and is expected to grow at 11.3% and generate export revenue of the order of US\$22.7 Billion in year 2014-15 as compared to US\$20.4 Billion in year 2013-14. (Rs.141648 Crores in 2014-15 as compared to Rs.123216 Crores in year 2013-14 with a growth of 14.96%).

Certain data, in particular, data on the telecommunication sector, the IT industry and business process outsourcing (BPO) and data on the information society at large, are produced on a regular basis. A significant amount of data

exists on the IT service industry, collected by National Association of Software and Services Companies (NASSCOM), reflecting their members' data. In India, the indicators related to workforce, value added, imports & exports respectively are not strictly measured as per the International Standard Industrial Classification (ISIC). However, the information related to workforce & exports for this sector is maintained in National Association of Software and Services Companies (NASSCOM) for the IT-BPO sector. Similarly, data on IT manufacturing is captured by another private body, the Communication and Manufacturing Association of India (CMAI).

Annexure IV : Significant Accounting Policies

1) Basis of Preparation of Financial Statements:-

The financial statements have been prepared to comply in all material respects with applicable Accounting Standards issued by the Institute of Chartered Accountants of India. The financial statements have been prepared under the historical cost convention on an accrual basis of accounting, in accordance with applicable mandatory accounting standards prescribed under the Companies (Accounting Standards) Rules, 2014 and the relevant provisions of the Companies Act, 2013.

2) Use of Estimates:-

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities as at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in current and future periods.

3) Revenue Recognition:-

In Contact Centre Activity, revenue is recognized as the related services are performed, based on actual utilization or minimum utilization level, as appropriate, specified in the agreements.

In Claim Processing Activity, revenue is recognized based on number of claims processed, at contractual rates and terms as specified in the agreements.

In respect of other services, revenue for services rendered is recognized as per the terms of specific contracts.

Interest income is accounted on accrual basis and dividend income is accounted on right to receipt basis.

In respect of other heads of income, the Company follows the practice of accounting of such income on accrual basis.

4) Fixed Assets:-

Fixed assets are stated at the cost of acquisition less accumulated depreciation and impairment losses, if any. Cost of fixed assets comprises purchase price, duties, levies and any directly attributable cost of bringing the asset to its working condition for the intended use. Borrowing costs related to the acquisition or construction of the qualifying assets for the period up to the completion of their acquisition or construction is capitalized. Subsequent expenditures related to an item of tangible assets are added to its book value only if they increase the future benefits from the existing assets beyond its previously assessed standard of performance.

5) Depreciation/Amortization:-

Pursuant to the enactment of the Companies Act 2013 (the Act), the company has provided for depreciation with reference to the useful life of assets as recommended in schedule II to the act.

6) Investments:-

Investments that are readily realizable and are intended to be held for not more than a year from the date, on which such investments are made, are classified as current investments. All other investments are classified as long-term investments. Current investments are carried at lower of cost and fair value. Long-term investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.

7) Provision, Contingent Liabilities and Contingent Assets:-

Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance sheet date and are not discounted to its present value.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the Group or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made. Contingent liabilities are disclosed by way of Notes to Accounts.

Contingent assets are not recognized in the financial statements.

8) Taxation:-

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Indian Income-tax Act, 1961. Deferred income taxes reflect the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

9) Segment reporting:-

Identification of segments:

The Company's operating businesses are organized and managed according to the nature of service and predominant source of the risk for the Company is business service, therefore business segment has been considered as primary segment. The analysis of geographical segments is based on the areas in which the Company operates.

Segment policies:

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

10) Earnings per share:-

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders after deducting preference dividends and attributable taxes by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares, if any.

11) Impairment:-

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount.

The recoverable amount is the greater of the assets' net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. For the purpose of accounting of impairment, due consideration is given to revaluation reserve, if any. After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful lives.

A previously recognized impairment loss is increased or reversed depending on changes in circumstances. However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

12) Borrowing costs:-

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

13) Leases:-

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item are classified as Operating Leases. Operating Lease payments are recognized as an expense in the Profit & Loss Account on a straight line basis over the lease period.

14) Employee benefits:-

Retirement benefits in the form of Provident Fund contributed to Statutory Provident Fund is a defined contribution scheme and the payments are charged to the Profit and Loss Account of the year when the payments to the respective funds are due. There are no obligations other than contribution payable to Provident Fund Authorities.

15) Foreign Currency Translations:-

Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

Exchange differences

Exchange differences arising on settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise.

Forward exchange contracts not intended for trading or speculation purposes

The premium or discount arising at the inception of forward exchange contracts is amortized as expense or income over the life of the contract. Exchange differences on such contracts are recognized in the statement of profit and loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognized as income or as expense for the year.

16) Other Accounting Policies:-

These are consistent with the generally accepted accounting practices.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date. Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

10) Segment reporting:-

Identification of segments:

The Company's operating businesses are organized and managed according to the nature of service and predominant source of the risk for the Company is business service, therefore business segment has been considered as primary segment. The analysis of geographical segments is based on the areas in which the Company operates.

Segment policies:

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

11) Earnings per share:-

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders after deducting preference dividends and attributable taxes by the weighted average number of equity shares outstanding during the period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares, if any.

12) Impairment:-

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal/external factors. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount.

The recoverable amount is the greater of the assets' net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital. For the purpose of accounting of impairment, due consideration is given to revaluation reserve, if any. After impairment, depreciation is provided on the revised carrying amount of the assets over its remaining useful lives.

A previously recognized impairment loss is increased or reversed depending on changes in circumstances. However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

13) Borrowing costs:-

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

14) Leases:-

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased item are classified as Operating Leases. Operating Lease payments are recognized as an expense in the Profit & Loss Account on a straight line basis over the lease period.

15) Employee benefits:-

Retirement benefits in the form of Provident Fund contributed to Statutory Provident Fund is a defined contribution scheme and the payments are charged to the Profit and Loss Account of the year when the payments to the respective funds are due. There are no obligations other than contribution payable to Provident Fund Authorities.

16) Foreign Currency Translations:-

Initial recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Conversion

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction; and non-monetary items which are carried at fair value or other similar valuation denominated in a foreign currency are reported using the exchange rates that existed when the values were determined.

Exchange differences

Exchange differences arising on settlement of monetary items or on reporting Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognized as income or as expenses in the year in which they arise.

Forward exchange contracts not intended for trading or speculation purposes

The premium or discount arising at the inception of forward exchange contracts is amortized as expense or income over the life of the contract. Exchange differences on such contracts are recognized in the statement of profit and loss in the year in which the exchange rates change. Any profit or loss arising on cancellation or renewal of forward exchange contract is recognized as income or as expense for the year.

17) Other Accounting Policies:-

These are consistent with the generally accepted accounting practices.
