SECTION II: SUMMARY OF ISSUE DOCUMENT

A. OVERVIEW OF INDUSTRY

RAILWAYS TARGET 100% ELECTRIFICATION BY DEC 2023:

The Indian Railways (IR) has set a target of 100 per cent electrification of its network by December 2023, said economic survey 2021-22. The Indian Railways (IR) has set a target of 100 per cent electrification of its network by December 2023, said economic survey 2021-22. To achieve this target with creation of other infrastructure in the sector, the government has increased the CAPEX (Capital expenditures) by five-fold in the last seven years. Union Finance Minister Nirmala Sitharaman on Monday tabled Economic Survey 2021-22 in the Lok Sabha. The survey claims that IR is targeting 100 per cent electrification of its network by December 2023, upgradation of Delhi-Mumbai and Delhi-Kolkata corridors to 160 kmph and also elimination of level crossings on the Golden Quadrilateral and Golden Diagonal routes. The CAPEX has been increased substantially for IR from an average annual of Rs 45,980 crore during 2009-14 to Rs 2,15,058 crore during 2021-22. "An average of 1,835 track km per year of new track length has been added through new-line and multi-tracking projects during 2014-2021 as compared to the average of 720 track km during 2009-14," survey said. It mentioned that safety of the passengers and safe upkeep of railways assets is the topmost priority of IR. "With a continuing focus on safety of passengers the number of consequential train accidents has come down from 59 in 2018-19 to 55 in 2019-20 (pre-Covid) and further to 22 in 2020-21," it said.

In order to strengthen the agriculture sector, as on December 31, 2021, the railways has operated 1,841 Kisan Rail services, transporting approximately six lakh tonnes of perishables items including fruits and vegetables. During FY21, IR carried 1.23 billion tonnes of freight and 1.25 billion passengers. "Despite Covid-19 pandemic, revenue earning freight loading (excluding loading by Konkan Railway Corporation Ltd. (KRCL) was 1230.9 million tonnes in 2020-21 as compared to 1208.4 million tonnes during 2019-20. Passengers originating were 1,250 million in 2020-21 as compared to 8,086 million in 2019-20," it said. In order to provide better amenities, the IR has embarked on providing Wi-Fi internet services at all stations (excluding halt stations) and as on December 5, 2021, total 6,087 Railway Stations have been equipped with the facility. In addition, projects connecting difficult terrain such as Rishikesh- Karnaprayag line as also the rail network to connect all capitals of north east states are ongoing. Further, a number of infrastructure development initiatives are envisaged in the National Rail Plan (NRP) being prepared by the Indian Railways. The plan envisages the creation of a future ready railway system that is able to not only meet the passenger demand but also increase the modal share of railways in freight to 40-45 per cent from the present level of 26-27 per cent. As per the National Rail Plan, the freight ecosystem is expected to grow from the present level of 4,700 MT to 8,200 by 2030. "At present the railway capacity is barely able to carry 1,220 MT which is around 26-27 per cent of the modal share. The Plan provides a pipeline of projects, which on completion will increase railway capacity to capture 45 per cent of freight traffic," the plan said. To prevent further bleeding away of modal share, railway capacity enhancing projects have been categorized as 'Super Critical' and 'Critical'. A total of 58 projects have been identified as 'Super Critical' and are targeted for completion by December 2022. About 68 projects have been identified as 'Critical' and have been targeted for completion by March 2024.

"These projects are focused at increasing capacity on routes that serve major mineral, industrial hubs along with ports and major consumption centres," it said. "The next 10 years will see a very high level of CAPEX in the railway sector as capacity growth has to be accelerated such that by 2030 it is ahead of demand. As more projects are taken on hand and several sources of capital funding are developed, the CAPEX will increase further in coming years and the railway system will actually emerge as an engine of national growth," it added.

B. OVERVIEW OF BUSINESS

Incorporated in the year 2003, we are engaged in the field of Railway Infrastructure Development involving design, drawing, supply, Erection and Commissioning of 25KV, 50Hz Single Phase Traction Overhead Equipment. The key clients of the Company include various zones of the Indian Railways like Eastern Railway, South Eastern Railway, South East Central Railway, Northern Railway, East Coast Railway, North Frontier Railway, East Central Railway, Central Organisation for Railway Electrification (CORE) as well as large Public and Private Sector. Our major work encompasses electrification of new & existing Railway tracks helping nation to reduce dependability of fossil fuels thereby reducing the carbon print foot. Our services include concept to commissioning of Railway Infrastructure right from design to energization. We have completed hundreds of Kms of electrification & erected several traction substations in a span of 20 years. Our Company is based out in Chhattisgarh and this gives us an opportunity to offer our services to coal mines. Usually, coal mines in Chhattisgarh have to develop siding which is used to load and transport coals from mines to its respective customers. A siding, in rail terminology, is a low-speed track section distinct from a running line or through route such as a main line, branch line, or spur. It may connect to through track or to other sidings at either end.

Sidings often have lighter rails, meant for lower speed or less heavy traffic, and few, if any, signals. We have over the years developed many siding in the state to facilitate coal mines.

The Company has kept its focus on the Electrification sector of the Railways keeping in view the vast scope of work in the existing and the untapped areas. As a result, the Company has been able to build its resources capable of executing large, medium and small electrification projects in the most efficient and timely manner.

The Company first made forays into a highly technical field, overhead electrification of the Indian Railways and through series of events over the successive years made rapid and spectacular progress in its chosen field of work and with dedication, team work, commitment, discipline and astute planning and strategy, scaled newer heights of progress and glory.

2. *There is a case against our company in the District Court by the Labour Enforcement Officer.*

A case was registered against our company by the Labour Enforcement Officer, Central II, 1st Floor, Block C, CGO Complex, Seminary Hills, Nagpur under Minimum Wages Act/22(A)- General provision for punishment of other offences. Labour inspector was visiting our site in Nagpur where upon inspection he found some irregularities in the registers and other documents maintained by our staff. This case is in process and our company is making representation for the same, we do not assure what would be the outcome of the case and any financial penalty or any arrest of the directors or our key employee may result in financial loss and also would degrade the image of our company in the market. The case has not been concluded and is still pending for further hearings. The next date of hearing is 15th July 2022.

3. *There is a litigation against our promoter Mr. Nilesh Jobanputra.*

In a Criminal Miscellaneous Petition No. 1976 of 2018 before The High Court of Chhattisgarh, Bilaspur in Ritendra Kumar Solanki Versus Central Bureau of Investigation and others, the Promoter viz. Nilesh Jobanputra along with his father Kantilal Jobanputra are impleaded as Respondent Nos. 2 and 3 respectively. This matter pertains to a certain cause of action arising from certain material Reconciliation that takes place after a certain project is completed, but due to lack

of the paper work/ documentation of material Reconciliation at that time of inspection the authority was not able to find few documents as some of the documents were hand return. Therefore, a case was filed, as there was no proper record of such material Reconciliation. After the vigilance enquiry was made by the railways even the railways confirmed that no such case shall arise and further Railways transferred the case to Central Bureau of Investigation (CBI) and the CBI couldn't not find any such evidence towards the case existence and decided to transfer this case to the higher court. Hence the present proceedings and no conclusion or order has been passed by the court till date and such case is still pending in the court of law. This case is in process and our promoter is making representation for the same, we do not assure what would be the outcome of the case and any financial penalty or any arrest of the directors or our key employee may result in financial loss and also would degrade the image of our company in the market.

4. *The COVID-19 pandemic has had, and is expected to have, a material adverse effect on the travel industry and our business, financial condition, results of operations and cash flows.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the novel coronavirus disease ("COVID-19") outbreak a Public Health Emergency of International Concern on January 30, 2020, and a pandemic on March 11, 2020. The rapid and diffused spread of COVID-19 and global health concerns relating to this pandemic have had a severe negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so or could worsen for an unknown period of time, that could in turn have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity and growth. The extent to which the COVID-19 outbreak impacts our business, cash flows, results of operations and financial condition will depend on future developments, including the timeliness and effectiveness of actions taken or not taken to contain and mitigate the effects of COVID-19 both in India and internationally, which are highly uncertain and cannot be predicted. The COVID-19 pandemic has severely restricted the level of economic activity around the world, and the travel and tourism sector are one of the sectors that have been impacted most severely. In response to the COVID-19 pandemic, the government in India and governments in many countries and regions have implemented containment measures, such as imposing restrictions on travel and business operations and advising or requiring individuals to significantly limit the time spent outside of their homes. Individuals' ability to travel has been curtailed through border closures across the world, mandated travel restrictions and limited operations of hotels and airlines, and may be further limited through additional voluntary or mandated closures of travel-related businesses. Many of our customers and suppliers, including hotels and airlines, significantly curtailed their service offerings. These measures are being continuously re-evaluated by the relevant authorities, and whether these measures are eased, continued or increased is outside of our control or ability to predict. In particular, such measures to contain the COVID-19 pandemic have led to unprecedented levels of cancellations and limited new air travel, hotel and holiday bookings. We expect to continue to experience low travel demand, resulting in significant customer cancellations and refund requests and reduced new orders, particularly relating to international travel. We observed a significant decrease in supply of domestic transportation tickets and international air tickets in response to comprehensive containment measures in India and international regions. This is expected to continue until cancellations stabilize and travel demand begins to recover from current levels, at which time air travel, and hotel and holiday bookings and cash flow are expected to increase. We have implemented certain measures and modified certain policies in light of the COVID-19 pandemic. For further information,

5. *A slowdown in economic growth in India could have an adverse effect on our business, results of operations and financial condition.*

We operate in the field of Railway Infrastructure development. A slowdown in economic growth could affect business and lead to a decrease in demand for our services for prolonged periods.

We cannot assure you that such macroeconomic and other factors, which are beyond our control, would not significantly affect demand for our services. Consequently, the occurrence of such events could have an adverse effect on our business, results of operations and financial condition.

6. *Our Industry is labour intensive and our business operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.*

Our industry being labour intensive is dependent on labour force for carrying out its manufacturing operations. Shortage of skilled/unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. Though we have not experienced any major disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain, flexible labour policies, and we may face the threat of labour unrest, work stoppages and diversion of our management's attention due to union intervention, which may have a material adverse impact on our business, results of operations and financial condition.

7. *We do not own our registered office, corporate office premises and Workshop, which we have taken on lease. Any termination of agreements may require us to vacate such premises and adversely affect our business operations.*

Our registered office, corporate office and workshop is taken on lease from Ms. Daksha Jobanputra and Nilesh Jobanputra. If any such lease agreement under which we occupy the premises is not renewed on terms and conditions that are favorable to us, or at all, we may suffer a disruption in our operation which could have a material adverse effect on our business, financial condition and results of operations. If we do not comply with certain conditions of the lease, the lessor may terminate the lease, which could have an adverse effect on our operations and there can be no assurance that renewal of lease agreement with the owner will be entered into. In the event of non-renewal of lease, we may be required to shift our office to a new location and there can be no assurance that the arrangement we enter into in respect of new premises would be on such terms and conditions as the present one. For more details on properties taken on lease by our Company, please refer section "Land and Properties" in the chapter titled "**Our Business**" beginning on page 111 of this Prospectus.

8. *Failure to successfully procure raw materials and non-availability or high cost of quality of Raw Material (Steel, copper etc.) or to identify new raw material suppliers could adversely affect us.*

We work in the field of Railway Infrastructure Development involving design, drawing, supply, erection and commissioning of 25KV, 50HZ Single Phase Traction Overhead equipment. Our work is dependent upon raw material which is steel items, copper, aluminum, zinc items, and various electrical and bulk erection materials. Non-availability and price fluctuation of these items may adversely affect our business and increase our costing too as a result the financial condition and business operation may suffer loss.

9. *Concentration only in the specialized work i.e., 25KV Overhead electrification and Traction Substation work.*

We only concentrate in the area of railway electrification involving design, supply, erection and commissioning of 25KV, 50Hz Single phase traction overhead equipment, which is a small part of the field of Railway Infrastructure Development in India.

The limited scope of work may cause adverse effect too our business, financial condition and business operation.

10. *Our Company has not received "No Objection Certificate" from our lender to undertake the Issue.*

Our company has not received "No Objection Certificate" from our lenders to undertake this Issue. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, formulate a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios. There can be no assurance that we will be able to comply with these financial or other loan covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that is not waived by our lenders or is not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. For further information, see the chapter titled "**Statement of Financial Indebtedness**" on page 152 of the Prospectus. Further, as on the date of this Prospectus, we have not received "No Objection Certificate" from Bank of Baroda. We cannot assure you that the lenders will grant us "No Objection Certificate" for this Issue. Non-receipt of such "No Objection Certificate" could lead to non-compliance of the terms of loan agreements entered into by our Company with the lenders. Though these covenants are restrictive to some extent for us, however it ensures financial discipline, which would help us in the long run to improve our financial performance.

- 11. We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our clients. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.**

We are engaged in the field of Railway Infrastructure Development involving design, drawing supply, erection, and commissioning sector of India, our success depends on the smooth supply and transportation of the raw materials required for electrification process from the manufacturers to our unit which are subject to various uncertainties and risks. In addition, raw materials may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials which may also affect our business and our results of operation negatively. A failure to maintain a continuous supply of raw materials in an efficient and reliable manner could have a material and adverse effect on our business, financial condition and results of operations.

- 12. Operation in the oversaturated Railway Zones may adversely affect our business and have an adverse impact on our result of operations and financial condition.**

We operate mainly in oversaturated railway zones of India which result in delay in work progress due to non-availability of traffic block. This results to increase our labour cost and overhead cost and due to this our business adversely affects.

- 13. We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them.**

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long-term contract with any of customers nor has any marketing tie up for our products. Further, our Company has not appointed any exclusive agents for handling its operations. Any change in the buying pattern of our end users or disassociation of major customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

- 14. The shortage or non-availability of power facilities may adversely affect our business and have an adverse impact on our results of operations and financial condition.**

Our business processes require substantial amount of power facilities. The quantum and nature of power requirements of our industry and Company is such that it cannot be supplemented/ augmented by alternative/ independent sources of power supply since it involves significant capital expenditure and per unit cost of electricity produced is very high in view of increasing oil prices and other constraints. We are mainly dependent on State Government for meeting our electricity requirements. Any defaults or non-compliance of the conditions may render us liable for termination of the agreement or any future changes in the terms of the agreement may lead to increased costs, thereby affecting the profitability. Further since we are majorly dependent on third party power supply; there may be factors beyond our control affecting the supply of power.

Any disruption / non availability of power shall directly affect our production which in turn shall have an impact on profitability and turnover of our Company.

- 15. There are certain discrepancies/errors noticed in some of our corporate records relating to forms filed with the Registrar of Companies and other provisions of Companies Act, 1956/2013. Any penalty or action taken by any regulatory authority in future for non-compliance with provisions of corporate and other law could impact the financial position of the Company to that extent.**

Some of the approvals are required to be transferred in the name of “Jayant Infratech Limited” from “Jayant Infratech Private Limited” pursuant to name change of our company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.**

- 19. We have not yet applied for the registration of our logo. If we fail to obtain registration our brand building efforts may be hampered which might lead to adverse effect on our business.**

Our Company is currently using the logo which is not yet registered in the name of our Company neither we have made any application for the registration of the trademark with the respective authorities. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations. For further details, please refer to section titled “**Government and Other Approvals**” on page 172 of this Prospectus.

20. *Some of our corporate records including Bank statement of Allotment and forms filed with the Registrar of Companies are not traceable.*

Our Company was incorporated in the year 2003 under the Companies Act, 1956, hence Company is unable to trace certain corporate and other documents in relation to our Company including Bank Statements, Corporate Records, forms filed with the Registrar of Companies prior to the year 2006. Due to change in methods of record keeping over the years, certain forms filed with ROC prior to the year 2006 like Return of Allotment for the year prior to 2006 and corresponding bank statement could not be traced by our Company, also an application was made to the bank for bank statement for the said period but the bank had a change in their internal system due to which the statement weren't available with the bank as well. Further online filing of RoC documents was initiated in the year 2006 and all forms prior to the said year were physically filed, hence some of these forms could not be retrieved from Ministry of Corporate Affairs (MCA) portal. As such under the circumstances elaborated above, our Company cannot assure you that the filings were made in a timely manner or the information gathered through other available documents of the Company are correct. Also, our Company may not be in a position to attend to and / or respond appropriately to any legal matter due to lack of lost destroyed records and to that extent the same could adversely affect our business operations.

21. *We face competition in our business from organized, which may adversely affect our business operation and financial condition.*

The market in which our company is doing business is highly competitive on account of organized players. Players in this industry generally compete with each other on key attributes such as technical competence, experience, pricing and timely delivery. Some of our competitors may have longer industry experience and greater financial, technical and other resources, which may enable them to react faster in changing market scenario and remain competitive. Moreover, the unorganized sector offers their products at highly competitive prices which may not be matched by us and consequently affect our volume of sales and growth prospects. Growing competition may result in a decline in our market share and may affect our margins which may adversely affect our business operations and our financial condition.

22. *General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.*

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

23. *If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.*

Our industry is characterized by increasingly complex and integrated infrastructure and services, new and changing business models and rapid technological and regulatory changes. Our clients' needs and demands for our services evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients' demands for new services, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients' increasingly sophisticated requirements. Transitioning to these new technologies may be disruptive to our resources and the services we provide and may increase our reliance on third-party service providers. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our services to our clients, and adversely affect our business and future growth.

24. *Major fraud, lapses of internal control or system failures could adversely impact the company's business.*

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may

adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

25. *We continue to explore the diversification of our business and the implementation of new services. These diversifications and our other strategic initiatives may not be successful, which may adversely affect our business and results of operations.*

In order to achieve our goal, we are constantly evaluating the possibilities of expanding our business through new models, innovations and/or starting new services. Although we believe that there are synergies between our current business and our expansion plans, we do have experience or expertise in these new areas. These new businesses and modes of delivery and the implementation of our strategic initiatives may pose significant challenges to our administrative, financial and operational resources, and additional risks, including some of which we are not aware of. The early stages and evolving nature of some of our businesses also make it difficult to predict competition and consumer demand therein. Our strategic initiatives require capital and other resources, as well as management attention, which could place a burden on our resources and abilities. In addition, we cannot assure you that we will be successful in implementing any or all of our key strategic initiatives. If we are unable to successfully implement some or all of our key strategic initiatives in an effective and timely manner, or at all, our ability to maintain and improve our leading market position may be negatively impacted, which may have an adverse effect on our business and prospects, competitiveness, market position, brand name, financial condition and results of operations.

26. *Any deficiency in our products could make our Company liable for customer claims, which in turn could affect our Company's results of operations.*

Our Company is bound by the terms and conditions as placed before its customers. There are no specific regulations governing the supply of the same, other than the general law of contracts. Any claims made by these customers for deficiency in our products, would be subject to these terms and conditions, which are in the nature of normal contractual obligations in India. Any violation of these obligations could impact our Company's results of operations. For further details of our business, please refer chapter titled "***Our Business***" beginning on Page 111 of this Prospectus.

27. *Our company in some cases provides its services through a job work from third party which is expose to risk of quality and durability of our Products.*

Our company in some cases provide its services through job work from third party. There is possibility that our company may face rejection of product on several occasions which exposes us to risk of additional losses. We may not be able to deliver the requisite quality of products to the customers which in turn would affect the credibility, profitability and cash flows of our company.

28. *Activities involving our services process can be dangerous and can cause injury to people or property in certain circumstances.*

A significant disruption at any of our manufacturing facilities may adversely affect our production schedules, costs, revenue and ability to meet customer demand. Our business involves manufacturing processes that can be potentially dangerous to our employees. An accident may result in loss of life, destruction of property or equipment, manufacturing, or delivery delays, or may lead to suspension of our operations and/or imposition of liabilities. While we believe we may maintain adequate insurance, interruptions in production as a result of an accident may also increase our costs and reduce our revenue, and may require us to make substantial capital expenditures to remedy the situation or to defend litigation that we or our senior management may become involved in as a result, which may negatively affect our profitability, business, financial condition, results of operations and prospects. Any negative publicity associated therewith, may have a negative effect on our business, financial condition, results of operations and prospects.

29. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory for work purpose and stocks of finished products. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirements and purchase new inventory accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory. Further, if we fail to sell the inventory we purchase, we may be required to write-down our inventory or pay our suppliers without new purchases, or create additional vendor financing, which could have an adverse impact on our income and cash flows. We estimate our sales based on the demand and requirements and also on the customer specifications. In addition, disruptions to the delivery of products to our warehouse or customer may occur for reasons such as poor handling, transportation bottlenecks, or labour strikes, which could lead to delayed or lost

deliveries or damaged products and disrupt supply of these products. If we over-stock inventory, our capital requirements will increase and we will incur additional financing costs. If we under-stock inventory, our ability to meet customer demand and our operating results may be adversely affected. Any mismatch between our planning and actual consumer consumption could lead to potential excess inventory or out-of-stock situations, either of which could have an adverse effect on our business, financial condition and results of operation.

30. *We face intense competition in our businesses, which may limit our growth and prospects. Our Company faces significant competition from other companies in Railway Infrastructure Development industry.*

We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

31. *Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.*

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our services;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;
- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

32. *If we are unable to renew our existing leases or secure new leases for our existing or premises, or offices on commercially acceptable terms, or if we fail to comply with the terms and conditions of our leases resulting in termination of our leases, it could have a material adverse effect on our business, financial condition and results of operations.*

The registered office that we are currently operating from is on leased/licensed basis. We typically enter into lease agreements for a period of 11 months for our office and factory. For details on the duration of existing leases for our delivery centres, see "**Our Business**" on page 111. In the event that if we fail to comply with the terms and conditions

of our lease or that these existing leases are terminated or they are not renewed on commercially acceptable terms, we may suffer a disruption in our operations. If alternative premises are not available at the same or similar costs, size or locations, our business, financial condition and results of operations may be adversely affected. In addition, any adverse development relating to the landlord's title or ownership rights to such properties may entail incurring significant legal expenses and adversely affect our operations, a significant interest penalty for any delays in payment of rent and fixed price escalation clauses that provide for a periodic increase in rent. If our sales do not increase in line with our rent and costs, our profitability and results of operations could be adversely affected.

- 33. Our Company has a negative cash flow from its operating activities for the period ended on December 31, 2021 and financing activities for the period ended on December 31, 2021 and financial year 2019-20 and investing activities in the past 3 years, details of which are given below. Sustained negative cash flow could impact our growth and business.**

Our Company had negative cash flows from our operating activities as well as investing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

Particulars	(₹ in lakh)			
	Upto December 31, 2021	March 31, 2021	March 31, 2020	March 31, 2019
Net Cash from Operating Activities	(380.28)	129.60	328.33	187.13
Net Cash from Investing Activities	280.92	(169.29)	(206.03)	(280.21)
Net Cash from Financing Activities	(58.29)	215.10	(75.47)	229.32
Net Increase/ (Decrease) in Cash & Cash Equivalents	(157.65)	175.40	46.82	136.24

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

- 34. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.**

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

- 35. Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.**

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on services is critical to the success of the customer acquisition process of our business. Although, we expect to allocate significant number of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

- 36. Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.**

We may also face cyber threats such as: (i) Phishing and Trojans - targeting our customers, wherein fraudsters send unsolicited codes or mails to our customers seeking account sensitive information or to infect customer machines to search and attempt ex-filtration of account sensitive information; (ii) Hacking – wherein attackers seek to hack into our infrastructure with the primary intention of causing reputational damage to us by disrupting services; (iii) Data theft – This can be internal i.e. by someone who has access to data of our Company or external wherein unconnected cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and (iv) Advanced persistent threat – a network attack in which an unauthorized person gains access to our network and remains undetected for a long period of time In the event of a significant decline in the demand for our products, our business, results of operations and financial condition may be materially and adversely affected.

Our systems are potentially vulnerable to data security breaches, whether by our employees, or our service providers or others that may expose sensitive data to unauthorized persons. We process and transfer data, including personal information, financial information and other confidential data provided to us by our clients. Although we maintain systems and procedures to prevent unauthorized access and other security breaches, it is possible that unauthorized individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of our clients' investors or our employees. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and reputation.

37. *The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.*

Time is often of the essence in our business work. In the event there are delays in our current or future service, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in services by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

38. *Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.*

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

39. *Breakdown of machinery and/or equipment used for the purpose of manufacturing process*

Any breakdown or defect in the machinery and/or the equipment used for the purpose of our process may delay the production process as a whole and result in missing deadlines in delivery of product if we are able to repair the machines or replace it within relevant timelines. Any such delays may have an adverse effect on the business of the Company.

40. *We have entered into related party transactions in the past and may continue to do so in the future.*

Our Company has entered into various transactions with our Promoter and associate companies. While we believe that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favorable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter "**Related Party Transactions**" beginning on page 149 of this Prospectus.

41. *Underutilization of capacity of our facility may adversely affect our business, results of operations and financial conditions.*

We cannot assure that we shall be able to utilize our facility to their full capacity or up to an optimum capacity, and non-utilization of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition. Even use of the proposed production capacity is subject to several variables like

availability of raw material, power, water, proper working of machinery, orders on hand, supply/demand, manpower, etc.

42. *Our top 5 and top 10 customers contribute major portion of our revenues for the period ended on December 31, 2021. Any loss of business from one or more of them may adversely affect our revenues and profitability.*

Our top five and top ten customers contribute to a substantial portion of our revenues for the period ended on December 31, 2021. Any decline in our quality standards, growing competition and any change in the demand for our service by these customers may adversely affect our ability to retain them. We believe we have maintained good and long-term relationships with our customers. However, there can be no assurance that we will continue to have such long-term relationship with them, also any delay or default in payment by these customers may adversely affect our business, financial condition and results of operations. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability.

Due to COVID-19 pandemic, there may have been a temporary reduction in demand for our services and there may have been an overall slowdown in the industry. Further, such pandemic situations may also arise in the future and that could materially and adversely affect our business, financial condition and results of operations. Our growth has required and will continue to require increased investments in management personnel and systems, financial systems and controls, and office facilities. However, we cannot assure you that such investments will yield desired results and we may incur costs that we may not be able to recover. We may also be unable to hire additional qualified personnel to support the offering of a wider range of services. If we fail to manage our growth, we may experience operating inefficiencies, dissatisfaction among our client base, and lost revenue opportunities, which may adversely affect our business, results of operations and financial condition.

43. *Our operations may be adversely affected in case of industrial accidents at our working sites*

Usage of heavy machinery, handling of sharp parts of machinery by labour during production processor otherwise, short circuit of power supply for machines, etc. may result in accidents and fires, which could cause indirect injury to our labour, employees, other persons on the site and could also damage our properties thereby affecting our operations. Further, our plant and machinery and personnel may not be covered under adequate insurance for occurrence of particular types of accidents which could adversely hamper our cash flows and profitability.

44. *Our Promoter and Promoter Group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.*

Upon completion of the Issue, our Promoter and Promoter Group will own 71.44 % of the Post-Issue Equity Share capital of the Company. As a result, the Promoter and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval, including the election of directors and approval of significant corporate transactions. The Promoter and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoter' shareholding, please refer chapter titled "*Capital Structure*" beginning on Page No. 55 of this Prospectus.

45. *We are dependent on a number of Key Managerial Personnel and our senior management, and the loss of, or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

Our performance depends largely on the efforts, expertise and abilities of our Key Managerial Personnel, senior management, and our operational personnel who possess significant experience in the industry in which we operate. We believe that the inputs and experience of our KMP and senior management, in particular, and other key personnel are valuable for the development of our business, operations and the strategic directions taken by our Company. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. Moreover, we may be required to substantially increase the number of our qualified personnel in connection with any future growth plans, and we may face difficulty in doing so due to the intense competition in the technology industry for such personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past in order to remain competitive in retaining.

Further, the COVID -19 pandemic has dynamically altered the approach on workplace hygiene and safety and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health

and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees' contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the well-being of our employees.

46. *Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.*

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

47. *Delays or defaults in payments from our clients could result into a constraint on our cash flows. The efficiency and growth of our business depends on timely payments received from our clients.*

In the event, our client's default or delay in making payments and clearing their dues, we may not have adequate resources to fund our business and implement our growth plans. This could have an adverse effect on the results of operations and our financial condition.

48. *The shortage or non-availability of power facilities may adversely affect our business processes and have an adverse impact on our results of operations and financial condition.*

Our business processes require substantial amount of power facilities. We do not have arrangements for alternative/independent sources of power supply as of now. We are mainly dependent on local electricity service provider for meeting our electricity requirements, there may be factors beyond our control affecting the supply of power. Any power failure may lead to increased costs, thereby affecting the profitability.

49. *Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.*

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

50. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled "*Objects of the Issue*" on page 84 of this Prospectus.

51. *Guarantees from Promoter & Director as well as others have been taken in relation to the debt facilities provided to us.*

In an event any of the guarantors withdraws or terminates this guarantee, the lender for such facilities may ask for alternate guarantee/s, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantee/s satisfactory to the lender and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could adversely affect our financial condition.

For more information, please see the chapter titled “*Statement of Financial Indebtedness*” beginning on page 152 of this Prospectus.

52. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 150 of this Prospectus.

53. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

54. *Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

55. *Certain Agreements /deeds may be in the previous name of the company.*

Our certain agreements and deeds may be in the name of the erstwhile name of the company i.e., **Jayant Infratech Limited**. In case we fail to change the name in the agreements and deeds, it may cause adverse effect on Our company’s business.

56. *Some of the KMPs is associated with our company for less than one year.*

Our Key Management Personnel, Company Secretary is associated with the Company for a period of less than one year therefore they may not have been accustomed to the company affairs till date. For details of Key Management Personnel and their appointment, please refer to chapter “*Our Management*” beginning on page 125 of this Prospectus.

57. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.*

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

- 58. *Excessive reliance on our information technology systems and their failure could harm our relationship with customers, expose us to lawsuits or administrative sanctions or otherwise adversely affect our provision of service to customers and our internal operation.***

As part of our business strategy, we use high quality of information technology system to deliver our services in the best possible way. We have an exemplary track record for completion of the projects within the stipulated time period but there may be the system interruptions, errors, or downtime which could result from a variety of causes including changes in technology, technology failure, changes in system, and power failure etc. these may affect our business adversely.

- 59. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.***

Since, the Issue size is less than ₹10,000 Lakh, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoter and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

- 60. *Negative publicity could adversely affect our revenue model and profitability.***

We work in the market where trust of the customers on us and upon the services provided by us matters a lot. Any negative publicity regarding our company or the services rendered by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

- 61. *Industry information included in this Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.***

We have relied on the reports of certain independent third party for purposes of inclusion of such information in this Prospectus. These reports are subject to various limitations and based upon certain assumptions that are subjective in nature. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy as may be the case elsewhere. Statements from parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

- 62. *The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength

of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

Issue Specific Risks:

- 63. *There are restrictions on daily/weekly/monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

- 64. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- a. Volatility in the Indian and global capital market;
- b. Company's results of operations and financial performance;
- c. Performance of Company's competitors,
- d. Adverse media reports on Company or pertaining to the agriculture Industry;
- e. Changes in our estimates of performance or recommendations by financial analysts;
- f. Significant developments in India's economic and fiscal policies; and
- g. Significant developments in India's environmental regulations.

Current valuations may not be sustainable in the future and may also not be reflective of future valuations for our industry and our Company. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

- 65. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.***

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, 2013, in the event that the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

- 66. *The Issue price of our Equity Shares may not be indicative of the market price of our Equity shares after the issue.***

The Issue price of our equity Shares has been determined by fixed price method. This price is based on numerous factors and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuation after the issue and may decline below the issue price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue price. For further details you may refer chapter titled "*Basis for Issue Price*" beginning on the page 90 of this Prospectus.

Some of the factors which may affect our share price without limitations are as follows:

- Reports on research by analysts.
- Changes in revenue.
- Variations in growth rate of our financial indicators such as earning per share, income, profit etc.
- General Market Condition
- Domestic and International Economy.

67. *Sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the Trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoter or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

EXTERNAL RISKS

Industry Related Risks:

68. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

69. *Malpractices by some players in the industry affect overall performance of emerging Companies*

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

Other Risks:

70. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this

provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long-term capital gains exceed ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

71. *Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.*

As stated in the reports of the Auditor included in this Prospectus under chapter "**Financial Statements as Restated**" beginning on page 151 the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

72. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

73. *Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.*

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

74. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Prospectus.*

While facts and other statistics in this Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our

respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Our Industry*” beginning on page 95 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

75. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

76. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

77. *Natural calamities could have a negative impact on the Indian economy and cause Our Company’s business to suffer.*

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

78. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

79. *Any downgrading of India’s sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

GOLBAL ECONOMY AT LARGE

War Slows the Recovery

The war in Ukraine has triggered a costly humanitarian crisis that, without a swift and peaceful resolution, could become overwhelming. Global growth is expected to slow significantly in 2022, largely as a consequence of the war. A severe double-digit drop in GDP is expected in Ukraine due to fighting. A deep contraction is projected for Russia due to sanctions and European countries' decisions to scale back energy imports. The economic costs of war are expected to spread farther afield through commodity markets, trade, and—to a lesser extent—financial interlinkages. Fuel and food price rises are already having a global impact, with vulnerable populations—particularly in low-income countries—most affected. The war in Ukraine will amplify economic forces already shaping the global recovery from the pandemic. The war has further increased commodity prices and intensified supply disruptions, adding to inflation. Even before Russia invaded Ukraine, broad price pressures had led central banks to tighten monetary policy and indicate increasingly hawkish future stances. As a result, interest rates had risen sharply and asset price volatility had increased since the start of 2022—hitting household and corporate balance sheets, consumption, and investment. The prospect of higher borrowing costs has also increased the cost of extended fiscal support. These changes are occurring faster than previously expected even as many parts of the global economy—particularly countries with low vaccination rates—must contend with continued strain on health care systems because of the pandemic. The war has also added to already high uncertainty about the global outlook. Although many countries appear to be moving past the acute phase of the pandemic, new variants could again lead to waves of infection and further disruption. Inflation pressure could strengthen more than anticipated and demand more aggressive policy responses. Tighter financial conditions will shine a harsh spotlight on debt vulnerabilities among sovereign and corporate borrowers, risking widespread debt distress. Moreover, with continued tight policies toward the real estate sector and the possibility of more widespread lockdowns as part of the strict zero-COVID strategy, China's economy could slow more than currently projected—with consequences for Asia and beyond. This could further set back the recovery, particularly in emerging market and developing economies. More limited policy space could compound scarring effects, particularly in emerging market and developing economies, where medium-term baseline output is expected to be close to 6 percent below pre-pandemic projections. More fundamentally, geopolitical tensions threaten the rules-based frameworks that have governed international economic relations since World War II. Current sanctions imposed with the aim of pressing Russia to end the war are already cutting financial and trade linkages between Russia and other countries, with far-reaching repercussions. Increased global polarization also impedes the cooperation essential for long-term prosperity. This could include derailing the urgent climate change agenda and undermining multilateral efforts to improve debt resolution frameworks, trade integration, and initiatives to avoid future pandemics. This chapter first discusses the global growth outlook before outlining spillover channels from the war in Ukraine, inflation prospects, and the implications of rising interest rates for emerging market and developing economies. The discussion then turns to the risks to the outlook and policies for improving global prospects.

Fragmentation and Fragility Set to Slow Growth during 2022–23

The war in Ukraine has led to extensive loss of life, triggered the biggest refugee crisis in Europe since World War II, and severely set back the global recovery. After a strong recovery in 2021, short-term indicators suggest that global activity has slowed (see Figure 1.1). Global growth is projected to decline from an estimated 6.1 percent in 2021 to 3.6 percent in 2022–23—0.8 and 0.2 percentage points lower for 2022 and 2023 than in the January 2022 *World Economic Outlook*. The ongoing war in Ukraine and sanctions on Russia are expected to reduce global growth in 2022 through direct impacts on the two countries and global spillovers. This shock comes just as the threat from the Omicron variant appeared to be fading, with many parts of world moving past the acute phase of the pandemic.

Figure 1.1. Global Activity Indicators
(Three-month moving average)

Five principal forces shape the near-term global outlook:

War in Ukraine - The invasion and resulting sanctions on Russia will have important consequences for the global economy. The baseline forecast assumes that the theater of conflict remains limited to Ukraine and that sanctions on Russia (along with European plans to become independent of Russian energy) do not tighten beyond those announced by March 31 and remain in place over the forecast horizon. The effects of conflict and sanctions will hit Ukraine, Russia, and Belarus directly. But international spillovers via global commodity prices, trade and financial linkages, labor supply, and humanitarian impacts will spread the effects more widely—notably in Europe.

Monetary tightening and financial market volatility— Even before the war, inflation had risen significantly (Figure 1.2), and many central banks tightened monetary policy. This contributed to a rapid increase in nominal interest rates across advanced economy sovereign borrowers. In the months ahead, policy rates are generally expected to rise further and record-high central bank balance sheets will begin to unwind, most notably in advanced economies (for more discussion, see the April 2022 Global Financial Stability Report).

Figure 1.2. Inflation Trends
(Three-month moving average; annualized percent change)

In emerging market and developing economies, several central banks also tightened policy, adding to those that had already done so in 2021. One exception is China, where inflation remains low and the central bank cut policy rates in January 2022 to support the recovery. Expectations of tighter policy and worries about the war have contributed to financial market volatility and risk repricing (see the April 2022 Global Financial Stability Report). In particular, the war and related sanctions have tightened global financial conditions, lowered risk appetite, and induced flight-to-quality flows. In Russia, the sanctions and the impairment of domestic financial intermediation have led to large increases in its sovereign and credit default swap spreads. Emerging market economies in the region, as well as Caucasus, Central Asia, and North Africa, have also seen their sovereign spreads widen. Emerging markets capital outflows in early March were as large and fast as those seen early in the pandemic, albeit concentrated among a few economies. Since mid-March, though, the situation has stabilized, with slow-but-steady capital inflows reversing around one quarter of initial losses. Overall, markets have so far differentiated across emerging market securities based on geographic proximity, trade linkages, and commodity exposures to Russia and Ukraine.

Fiscal withdrawal—Policy space in many countries has been eroded by necessary higher COVID-related spending and lower tax revenue in 2020–21. Faced with rising borrowing costs, governments are increasingly challenged by the imperative to rebuild buffers. Fiscal support is set to generally decline in 2022 and 2023—particularly in advanced economies—as emergency measures to cushion the impact of the pandemic are wound down; also see the April 2022 Fiscal Monitor for more discussion on the evolution of fiscal measures over the acute phase of the pandemic and subsequent recovery).

China’s slowdown—Slowing growth in China’s economy has wider ramifications for Asia and for commodity exporters. The combination of more transmissible variants and a zero-COVID strategy entail the prospect of more frequent lockdowns, with attendant effects on private consumption in China. Moreover, the continued tight stance toward highly leveraged property developers means that real estate investment remains subdued.

Pandemic and vaccine access—Worker shortages and mobility restrictions compounded supply disruptions and bottlenecks early in 2022, constraining activity and adding to inflation. Restrictions have begun to ease as the peak of the Omicron wave passes and global weekly COVID deaths decline. The risk of infection leading to severe illness or death appears lower for the dominant Omicron strain than for others—especially for the vaccinated and boosted. The baseline assumes that the health and economic impacts of the virus start to fade in the second quarter of 2022 and that hospitalizations and deaths are brought to low levels in most countries by the end of the year. A key assumption in the baseline is that the virus does not mutate into new strains requiring further restrictions (see “Risks Are Large and to the Downside” in this chapter). The baseline assumes that and gas embargo by some large economies will have a severe impact on the Russian economy. Announced plans by large consumers to wean themselves off Russian energy will also hit in the medium-term. To stave off capital flight, the central bank of Russia has increased the interest rate and broad capital controls have been introduced. Yet financial markets have been turbulent, with the ruble falling close to 60 percent, before returning to near pre-invasion levels in recent weeks, sovereign spreads widening more than 2,500 basis points, and stock markets temporarily suspended. The withdrawal of foreign firms has hobbled many industries, including aviation, finance, software, and agriculture. As a result, the outlook remains bleak. Moreover, financial disintermediation and a loss of investor confidence will lead to a significant drop in private investment and consumption, only partly offset by fiscal spending. The baseline forecast is for a sharp contraction in 2022, with GDP falling by about 8.5 percent, and a further decline of about 2.3 percent in 2023.

RAILWAY INDUSTRY IN INDIA

RAILWAYS TARGET 100% ELECTRIFICATION BY DEC 2023:

The Indian Railways (IR) has set a target of 100 per cent electrification of its network by December 2023, said economic survey 2021-22. The Indian Railways (IR) has set a target of 100 per cent electrification of its network by December 2023, said economic survey 2021-22. To achieve this target with creation of other infrastructure in the sector, the government has increased the CAPEX (Capital expenditures) by five-fold in the last seven years. Union Finance

Minister Nirmala Sitharaman on Monday tabled Economic Survey 2021-22 in the Lok Sabha. The survey claims that IR is targeting 100 per cent electrification of its network by December 2023, upgradation of Delhi-Mumbai and Delhi-Kolkata corridors to 160 kmph and also elimination of level crossings on the Golden Quadrilateral and Golden Diagonal routes. The CAPEX has been increased substantially for IR from an average annual of Rs 45,980 crore during 2009-14 to Rs 2,15,058 crore during 2021-22. "An average of 1,835 track km per year of new track length has been added through new-line and multi-tracking projects during 2014-2021 as compared to the average of 720 track km during 2009-14," survey said. It mentioned that safety of the passengers and safe upkeep of railways assets is the topmost priority of IR. "With a continuing focus on safety of passengers the number of consequential train accidents has come down from 59 in 2018-19 to 55 in 2019-20 (pre-Covid) and further to 22 in 2020-21," it said.

In order to strengthen the agriculture sector, as on December 31, 2021, the railways has operated 1,841 Kisan Rail services, transporting approximately six lakh tonnes of perishables items including fruits and vegetables. During FY21, IR carried 1.23 billion tonnes of freight and 1.25 billion passengers. "Despite Covid-19 pandemic, revenue earning freight loading (excluding loading by Konkan Railway Corporation Ltd. (KRCL) was 1230.9 million tonnes in 2020-21 as compared to 1208.4 million tonnes during 2019-20. Passengers originating were 1,250 million in 2020-21 as compared to 8,086 million in 2019-20," it said. In order to provide better amenities, the IR has embarked on providing Wi-Fi internet services at all stations (excluding halt stations) and as on December 5, 2021, total 6,087 Railway Stations have been equipped with the facility. In addition, projects connecting difficult terrain such as Rishikesh- Karnaprayag line as also the rail network to connect all capitals of north east states are ongoing. Further, a number of infrastructure development initiatives are envisaged in the National Rail Plan (NRP) being prepared by the Indian Railways. The plan envisages the creation of a future ready railway system that is able to not only meet the passenger demand but also increase the modal share of railways in freight to 40-45 per cent from the present level of 26-27 per cent. As per the National Rail Plan, the freight ecosystem is expected to grow from the present level of 4,700 MT to 8,200 by 2030. "At present the railway capacity is barely able to carry 1,220 MT which is around 26-27 per cent of the modal share. The Plan provides a pipeline of projects, which on completion will increase railway capacity to capture 45 per cent of freight traffic," the plan said. To prevent further bleeding away of modal share, railway capacity enhancing projects have been categorized as 'Super Critical' and 'Critical'. A total of 58 projects have been identified as 'Super Critical' and are targeted for completion by December 2022. About 68 projects have been identified as 'Critical' and have been targeted for completion by March 2024.

"These projects are focused at increasing capacity on routes that serve major mineral, industrial hubs along with ports and major consumption centres," it said. "The next 10 years will see a very high level of CAPEX in the railway sector as capacity growth has to be accelerated such that by 2030 it is ahead of demand. As more projects are taken on hand and several sources of capital funding are developed, the CAPEX will increase further in coming years and the railway system will actually emerge as an engine of national growth," it added.

2,000 km of rail network will be brought under 'Kavach' in 2022-'23: Railway Minister

'Kavach', the indigenously developed Automatic Train Protection (ATP) system, will be deployed across the entire rail network beginning with 2,000 km in the 2022-23 fiscal and will be rolled out in 4,000 to 5,000 km every subsequent year, Railway Minister Ashwini Vaishnaw said on Friday. 'Kavach', which literally means armour, is being promoted by the Railways as the world's cheapest automatic train collision protection system.

Announced in the 2022 Union Budget as a part of the Atmanirbhar Bharat initiative, 2,000 km of rail network is planned to be brought under 'Kavach' for safety and capacity augmentation in 2022-23. "In the budget 2,000 km has been approved and in subsequent years 'Kavach' will be deployed in 4,000-5,000 km every year," Vaishnaw told reporters after inspecting the working of 'Kavach' between the Lingampalli–Vikarabad section of Secunderabad division, South Central Railway. It is designed, developed and manufactured in India and will be deployed in India and exported to the world, he said. So far, 'Kavach' has been deployed on over 1,098 route km and 65 locos in on-going projects of the South Central Railway. 'Kavach' is designed to bring a train to a halt automatically when it notices another train on the same line within a prescribed distance.

Budget 2022: Indian Railways capex at all-time high of Rs 2.45 trillion

The capex for 2022-23 includes Rs 1.37 trillion from general revenues, Rs 1.08 trillion from Internal and Extra Budgetary Resources and Rs 200 crore from Nirbhaya fund. With the government giving an extra thrust on PM GatiShakti, the Indian Railways is set to see its highest-ever capital expenditure (capex) of Rs 2.45 trillion for 2022-23, up 14 per cent from the Revised Estimate (RE) of Rs 2.15 trillion for the current financial year in the Union Budget for 2022-23 presented by Union Finance Minister Nirmala Sitharaman on Tuesday.

This will result in the operating ratio, a key metric to assess the Railways' financial health, coming under pressure.

"We are targeting 96.98 per cent operating ratio (OR) in the coming year. We believe we will improve this. We are today already achieving over 4 million tonnes of loading every day. We are now targeting a consistent 4.5 million tonnes per day and then 5 million tonnes per day," Railway Minister Ashwini Vaishnaw told Business Standard.

Roughly put, this means the Railways aims to spend Rs 96.98 for every Rs 100 it earns in FY23. "Even though we have targeted it, we should be able to achieve better than that," he added.

The OR of the Indian Railways has worsened to 98.93 per cent in the RE for FY22. This is lower than the 96.15 per cent OR it had budgeted. Net revenue of the Railways crashed to Rs 875 crore in the RE of FY22, down from the budgeted Rs 6,561 crore.

For FY23, the Railways has budgeted a net revenue of Rs 5,360 crore.

“We generally achieve (freight) loading of around 1,200 MT a year. This year we are reaching close to 1,400 MT loading, this is a record. Since the physical performance has improved, there is no need to reimburse due to Covid-19 or because of any other reasons,” Vaishnav said.

The capex for FY23 includes Rs 1.37 trillion from general revenues, Rs 1.08 trillion from internal and extra budgetary resources (IEBR) and Rs 200 crore from the Nirbhaya fund.

The Railways’ total receipts, comprising revenues from passenger, goods, other coaching, sundry and other heads were kept at Rs 2.4 trillion in the BE for FY23 as against a revised estimate of Rs 2.02 trillion for the current fiscal. “Railways will develop new products and efficient logistics services for small farmers and SMEs, besides taking the lead in integration of postal and Railways networks to provide seamless solutions for movement of parcels,” Sitharaman had said in her Budget speech. As a part of Atmanirbhar Bharat, around 2,000 kilo meter of rail network will be brought under Kavach, the indigenous world-class technology for safety and capacity augmentation in FY23.

The Indian Railways in the year 2021 witnessed unprecedented growth in the development of infrastructure, innovation, capacity expansion of the network, freight diversification, etc. One of the largest railway networks in the world, the Indian Railways is spread over 67,956 km, with 13,169 passenger trains and 8,479 freight trains, plying 23 million travellers and 3 million tonnes (MT) of freight daily from 7,349 stations.

The Government of India has been focused on investing in railway infrastructure by implementing multiple investor-friendly policies including Foreign Direct Investments (FDI) to improve infrastructure for freight and high-speed trains. In fact, several domestic and foreign companies are currently looking to invest in Indian rail projects.

Major Policy Initiatives undertaken by the Government for the development of Indian Railways;

a. Gati Shakti Cargo Terminal Policy was launched to fast track the approvals and ease of establishing Cargo Terminals to increase the freight loading share of IR

b. Kisan Rail:

The Indian Railways started running Kisan Rail Service to transport perishables and agri-product, including milk, meat, and fish. With the Kisan Rail Service, the government has connected railways with agriculture to its advantage.

The government announced Kisan Railways in the Union Budget, 2020-21 and launched it for perishable items in September 2021. The first Kisan Rail Service was flagged off between Devlali (Maharashtra) and Danapur (Bihar) on 7th August 2021.

Currently, 1806 Kisan Rails are running on 153 routes (up to 24 Dember, 2021) and have carried around 5.9 lakh tones of agricultural products

c. Bharat Gaurav Trains:

Indian Railways has launched a new tourism product i.e. theme-based tourist circuit trains called ‘Bharat Gaurav’ that tap the vast tourism potential of India and showcase the rich cultural heritage of the nation.

Under this policy, registered Service Providers shall be offered rakes consisting of ICF coaches under the “Right to Use” model by Indian Railways (IR) for operations of Bharat Gaurav Trains. With these theme-based trains, the service providers spread across the country will be able to showcase untapped yet historically significant rich treasures in India.

They would also be able to refurbish the coaches and have been given full flexibility to decide the themes, tariff, interior designs and other business modalities.

d. Oxygen Express

During the peak COVID19 second wave in India, the IR launched “Oxygen Express” trains for the transport of medical oxygen (LMO) liquid and oxygen boxes across the country.

Upon receiving requests from various states, Indian Railways initiated the supply of liquid medical oxygen tanks by operationalizing Oxygen Express through green corridors in a bid to ensure faster transportation.

Within the last 1 year, IR has made huge progress in the delivery of Oxygen on wheels;

- i. 8 Oxygen generating plants have been installed and are functional in Railway hospitals. 17 more Oxygen plants have been sanctioned and at different stages of commissioning.
- ii. 69 Railway hospitals are providing treatment to railway staff affected by Covid-19. In these hospitals, the number of beds for Covid treatment has been increased from 2539 to 3948.
- iii. Total COVID beds have increased to 6972, ICU beds from 273 to 404, invasive ventilators from 62 to 3544, additional 449 non-invasive ventilators and 129 high flow nasal oxygen machines. Also, 3420 oxygen cylinders, were supplemented in Railway Hospitals.

Indian Railways’ green initiatives

In the Year 2021, the government undertook multiple projects in order to create a conducive environment for the development of Green Railways;

Today, IR is working in mission mode to become the largest Green Railways in the world and is moving towards becoming a “net zero carbon emitter” before 2030. In its fight against climate change, the Ministry has taken several steps which include electrification of tracks, replacing traditional toilet systems with bio-toilets, committing to plastic reduction, and more.

These initiatives are governed by principles of environmental conservation, sustainability, and cost-effectiveness in day-to-day operations.

a. Net Zero Railway

In a bid to become a “net zero carbon emitter” before 2030, Indian Railways has switched to renewable sources of energy and installed solar rooftops. It has established solar rooftop plants at over 1,000 stations and 400 service buildings. Further, 100% LED replacement has been done at all stations, offices, and residences of the Railways. Additionally, 39 workshops, 7 production units, 8 loco sheds, and 1 store depot have also been certified ‘GreenCo’.

b. Railway electrification

The Indian railways has been implementing measures to achieve 100% electrification of railways under its National Rail Plans. From 2014 onwards, the pace of railway electrification has increased by nearly 10 times.

Currently, the IR has electrified 1924 Route km up to 30 December 2021 against 1903 Last year during the period.

Further, according to the Ministry, by December 2023, the Indian railways will achieve 100% electrification. By the end of 2023, a target of 23,765 (RKM) is set to be achieved.

The electrification of railway tracks helps reduce pollution, save costs, and increase speed. Moreover, with the electrification of railways, dependence on imported oil would also reduce and is a step towards building an ‘Aatmanirbhar Bharat’.

c. Switching to Bio-toilets

Through the installation of bio-toilets in the entire fleet of coaches, the Indian railway has eliminated nearly 4,000 tonnes of excreta dropping on the tracks daily. This has led to saving on maintenance costs and reduced 54 lakh litres of water consumption every day.

With a plan to create a ‘future ready’ Railway system by 2030, IR released a National Rail Plan (NRP) for India – 2030. The objective of the Plan is to create capacity ahead of demand, which would cater to future growth in demand right up to 2050 and also increase the modal share of Railways to 45% in freight traffic.

With unprecedented growth in 2021, the Indian Railways is looking towards another year of infrastructure growth with innovative and sustainable initiatives in the pipeline.

Indian Railways: A sustainable development for the future

Rajesh Kumar Sinha, rail industry writer and serving Librarian with Indian Railways (IR), shares the operators' long-term vision, and details the projects and successes that are driving forward the modernisation of its railway network.

Indian Railways (IR) is one of the largest integrated railway networks in the world. With an enormous route length of more than 126,511 km, operating many thousands of regular trains over 7,325 stations, with an employee strength of nearly 1.1 million, the operations of IR certainly are one of the bigger, more varied and highly complex of any across the world. Owing 76,608 passenger coaches, 2,93,077 freight wagons and more than 12,000 locomotives, as the eighth largest employer in the world, IR plays a very critical and significant role in the economic life and operations of India.

No wonder IR requires itself to remain vigilant to the evolving situation and requirements of its society, economy and nation. The coronavirus pandemic has affected our operations and activities too. However, we have come up with a long-term National Rail Plan (NRP) with the objective of developing infrastructure, and capacity, with a special emphasis on enhancing our share of freight logistics in the overall share of IR revenues.

A long-term vision for Indian rail

Unlike previous IR plans, the new vision plan has envisaged preparing India's national transport for the coming decades of 2041 and 2051. Plans are afoot to study the physical, material and human resource limitations of the organisation, assessment of contemporary and future modal share of IR, future requirements of fixed and rolling stocks, funding and financing strategies.

One significant feature of the plan relates to preparing for capacity requirement, both in terms of passengers and freight, ahead of demand by targeting the peak and not merely the averages, as has been the case previously. Secondly, based on financing strategies, existing and future railways projects are to be identified based on options, evaluation and prioritisation.

Achievements

Between 2008-2014, eight studies were undertaken by IR including the Total Transport Study (RITES) and the India Transport Report, but, importantly, no comprehensive studies or work has been carried out, particularly in the last five years. Some of IR's major, more recent, achievements can be summarised as follows:

Dedicated Freight Corridors (DFCs)

The story of Dedicated Freight Corridors (DFCs) has been a spectacular one. Two of them, the Eastern Dedicated Freight Corridor (EDFC) and the Western Dedicated Freight Corridor (WDFC), are already functional, while four more DFCs have been planned where freight trains will run at an average of 90-100 km/hr, as against the existing 25-30 km/hr.

Connectivity

IR has connected almost the whole of India through the railways. States like Manipur, Tripura, Arunachal Pradesh, Jammu and Kashmir have all have been connected for the first time in the country's history, while more parts are being added to the IR network. Beyond the country's frontiers, IR is also working on initiating and enhancing connectivity with Bhutan, Bangladesh, Nepal, Myanmar and Pakistan.

Carbon neutral

Sustainable development is being achieved through the greater use of solar energy, biogas, bio-toilets in passenger trains, LED lights, rainwater harvesting, and reforestation. Substantial electrification is also being implemented to ensure IR becomes a carbon neutral transporter by 2030.

Stations

Passenger services and amenities have been improved substantially. Stations are much cleaner and, as part of a station redevelopment plan worth \$13 billion, 400 stations have been taken up in a Public-Private Partnership (PPP) model.

Safety

To address safety aspects, long considered to be one of IR's vulnerabilities, an Automated Fire Alarm System, an Automated Fog Assistance System, CCTV cameras for stations and trains, Wi-Fi enabled stations, complete elimination of unmanned railway crossings and faster modernisation and digitisation on doubling of railway tracks, as well as signalling systems, as part of the \$13 billion National Rail Safety Fund, are being developed and/or implemented.

High-speed trains

High-speed trains and semi-high-speed trains that may have seemed impossible in Indian conditions, are already functioning with some about to start. Gatiman Express, Vande Bharat Express, Tejas Express, and vista dome coaches have all been introduced within a short time, while the metro rail network is already running in 11 Indian cities. The bullet train on Ahmedabad-Mumbai is also being advanced, while five more high-speed bullet train routes are being finalised.

Tourism

A very significant, though less talked about aspect of IR, is its huge tourism potential. It has recently introduced specialised tourist trains such as the Punj Takht, Mahapariniravan Express, Ayodhya Circuit which are certain to add value and revenue to the ambitious expansion plans of the Indian railways.

A great future ahead

With plans to invest a massive \$320 billion in enhancing connectivity and profitability, IR is currently standing at the threshold of a great future. With more functional autonomy, professional management and effective utilisation of scarce resources and strategies, what was widely perceived as a 'white elephant' in Indian bureaucratic circles until recently could well emerge as one of the major public corporates donning the global economic landscape in the not-so-distant future.

IMPACT OF COVID-19 ON OUR BUSINESS

In late 2019, a novel strain of coronavirus (“COVID-19”) emerged and by March 11, 2020, it was declared a global pandemic by the World Health Organization. The spread of COVID-19 and the recent developments surrounding the global pandemic have had, and may continue to have, repercussions across local, national and global economies and financial markets. On March 14, 2020, India declared COVID-19 as a ‘notified disaster’ and imposed a nationwide lockdown announced on March 24, 2020. Subsequently, progressive relaxations have been granted for movement of goods and people and cautious re-opening of businesses and offices. While the recently commenced vaccination drive in India is a positive development, the COVID-19 pandemic has affected and is expected to continue to affect our business and operational performance in the near future. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have reacted by taking measures, such as instituting quarantines, restricting travel, prohibiting people from assembling in heavily populated areas, issuing lockdown orders and restricting the types of businesses that may continue to operate, ‘stay-at-home’ orders, and enforcing remote working regulations. These measures have led to a significant decline in economic activities, and has had and is having an unprecedented effect and a significant negative impact on the global travel industry. An individuals’ ability to travel has been curtailed through border closures across the world, mandated travel restrictions and limited operations of hotels, airlines, bus and railways. Since there was no movement of people, our company faced difficulties to make labour transport to our work sites and due to this we couldn’t conduct our business.

Phased implementation of Unified Payments Interface

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI payment mechanism.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one Working Day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law.

For further details, refer to the General Information Document available on the websites of the Stock Exchange and the Lead Manager.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The responsibility of granting approval for foreign investment under the Consolidated FDI Policy and FEMA has been entrusted to the concerned ministries / departments.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry (formerly Department of Industrial Policy and Promotion), Government of India (“DPIIT”) issued the Consolidated FDI Policy, which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. Up to 100% foreign investment under the automatic route is currently permitted in the sector of “Manufacturing”, which includes manufacture of cement and concrete products.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that: (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations, (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future FDI in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Each Applicant should seek independent legal advice about its ability to participate in the Issue. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Applicant shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold (i) outside of the United States in offshore transactions in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur; and (ii) to “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act), pursuant to the private placement exemption set out in Section 4(a) of the U.S. Securities Act.

The above information is given for the benefit of the Applicants. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Prospectus.
