## **2. Our Company has defaulted on payment of interest and repayment of loan in the past**

Our Company has defaulted in making payment of interest and repayment of against cash credit facility of ₹100.00 lakhs and term loan of ₹375.00 lakhs during the financial year ended 31<sup>st</sup> March 2019 to Allahabad Bank. However, as of the date of filing of this Prospectus, our Company has paid the entire aforesaid outstanding loan amount and interest due and payable, if any, thereon to Allahabad Bank. This default was due to a miscommunication between the Allahabad Bank and the Company regarding number of pending instalments towards the lending facilities. All dues were promptly cleared by the Company on cognizance of this default, thereafter the Allahabad Bank issued a no dues certificate to the Company. However, if the company defaults on any in any of the debt facility taken by the company, it may have an negative impact on the financials position of the company.

## **3. Our business is dependent on our manufacturing facility, and we are subject to certain risks in our manufacturing processes. Any unscheduled, unplanned or prolonged disruption of our manufacturing operations or shutdown of our manufacturing facility may have a material adverse effect on our entire manufacturing operations and consequently, our business, financial condition and our results of operations.**

Our manufacturing operation is based out of facilities located at Rewari, Haryana. Our manufacturing operations and consequently our business is dependent upon our ability to manage the manufacturing facility, which is subject to operating risks, including those beyond our control, such as the breakdown and failure of equipment or industrial accidents, lockdown, social unrest and natural disasters. In the event there are any disruptions at our manufacturing facility, due to natural or man-made disasters, workforce disruptions, regulatory approval delays, fire, failure of machinery, lack of access to assured supply of electrical power and water at reasonable costs or any significant social, political or economic disturbances, could reduce our ability to meet the conditions of our contracts, manufacture our products and adversely affect sales and revenues from operations in such period.

In addition to the loss as a result of such fire or industrial accident, any shutdown of our manufacturing facility could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any significant malfunction or breakdown of our machinery may entail significant repair and maintenance costs and cause delays in our operations. In addition, we may be subject to manufacturing disruptions due to contraventions of or non-compliance with the terms of various regulatory approvals applicable to the manufacturing facility may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities.

We also cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labour involved in our manufacturing facility, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations. In the event of prolonged interruptions in the operations of our manufacturing facility, we may have to import various supplies and products or purchase them locally in order to meet our obligations towards customers, which could affect our profitability, business and financial condition.

- 4. *Our business is dependent on the sale of our products to certain key customers. The loss of such customers, a significant reduction in purchases by such customers, or a lack of commercial success of a particular component of which we are a major supplier could materially adversely affect our business, results of operations and financial condition.***

We are dependent on certain key customers in the rail transportation sector. Our top 7 customers accounted for 97% and 96% of our revenues from sale of products on for Fiscals 2023 and 2022 respectively. As we are dependent on certain key customers, the loss of such customers including as a result of a dispute with or disqualification by them may materially affect our business and results of operations. The volume of sales to our customers may vary due to our customers' attempts to manage their inventory, design changes and changes in our customers' manufacturing strategy, which may result in a decrease in demand or lack of commercial success of a particular product of which we are a major supplier. Further, we do not generally have firm commitment or long-term purchase agreements with many of our key customers and instead rely on purchase orders issued by our customers from time to time. As we are dependent on certain key customers for a significant portion of our sales, the loss for any of the foregoing reasons of any one of our key customers, if not replaced, may materially adversely affect our business, results of operations and financial condition.

- 5. *Our Registered Office is not owned by us and we partly own the land occupied by our manufacturing facility from which we operate. The same are occupied by us on a rental basis. Disruption of our rights as lessee or termination of the agreements with our lessor would adversely impact our operations and, consequently, our business.***

Our Registered Office premises is situated at B-144 Second Floor DDA Shed Phase-1, Okhla Industrial Area Phase-1 New Delhi, South Delhi, Delhi -110020, India and is not owned by us. It is taken on rental basis for a period of 11 months commencing from July 01, 2023 and ending on May 31, 2024. Further, our Company has been occupying the factory located at Rewari, Haryana on partially on rental basis through 4 rent deeds dated March 01, 2023, April 01, 2023, March 01, 2023 and July 01, 2023 for a period of 11 months each. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favourable terms in future. If we are required to vacate the current premises, we would be required to make alternative arrangements for new office and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable / favourable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

- 6. *Availability of raw materials and fluctuation in raw material prices may have material adverse effects on our operating profit.***

The major raw materials required for our manufacturing process is steel. Due to market driven prices, we have no influence on the prices at which we can buy these raw materials, thereby limiting our ability to pass on any increase in raw material prices to our end customers. In addition, supply shortages or delays in deliveries of raw materials can also result in increased costs. Raw materials are subject to supply disruptions and price volatility caused by various factors such as the consumer demand, changes in government programs and regulatory sanctions etc. Our suppliers may be unable to provide us with a sufficient quantity of our raw materials at a suitable price for us to meet the demand for our products. In the event of any disruption in raw material supply in terms of requisite quantities and qualities, our production schedule may also be adversely affected having an impact on our business operations. Such events may adversely affect our reputation, business results of operations and reputation.

- 7. *Our Company's failure to maintain the quality standards of the products could adversely impact our business, results of operations and financial condition.***

The demand for our products depends on quality that we manufacture and market. Any failure of ours to maintain the quality standards may affect our business. Although we have put in place strict quality control procedures, we cannot assure that our products will always be able to satisfy our customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products or any other unforeseen events could adversely affect our reputation, our operations and our results from operations

**8. *Our Company had not made any provision for payment of gratuity to our employees.***

As per provision of Payment of Gratuity Act, 1972 (Act) a scheme for the payment of gratuity to employees shall be made upon applicability of the Act. Our company failed to determine the applicability of the act although the number of employees of the company has crossed the threshold limit as mentioned in the Act. Since the company was not aware of the applicability, the company failed to maintain any provisions for gratuity in any of the past financials' years. Upon identification of this non-compliance the same was rectified in the restated financials by taking actuarial valuation and making appropriate provisions for gratuity. Although no complaint had been filed against our company for non-compliance under any section of Act, and also no show cause notice in respect of the above has been received by the Company till date. But if the company is found to be in default in complying with any of the provisions of this Payment of Gratuity Act, 1972 or any rule or order made thereunder the employer shall be punishable with imprisonment for a term which may extend to one year, or with fine which may extend to Twenty-Five thousand rupees, or with both. Upon any such action the financial position of the company may be impacted.

**9. *Contracts entered into by our Company do not contain price escalation or variation clauses in respect of increases in materials' prices.***

Our contracts do not contain price escalation or variation clauses that provide for reimbursement by the customer or increases in the contract amount in the event of a variation in the prices of key materials required. Consequently, if the prices of materials required increase during the execution period, our Company's costs will increase, which will reduce our profitability and may lead to cost overruns. This may occur due to a variety of reasons that may be outside our control, including unanticipated changes in engineering design; increases in equipment costs, materials or manpower; delays associated with the delivery of equipment and materials, unforeseen construction conditions and delays caused by local weather. If we fail either to estimate costs accurately upon entry into a particular contract or to control costs during the term of a contract and are unable to renegotiate the contract to obtain an escalation in a given contract price, any costs in excess of the contract price will need to be absorbed by our Company and may affect its ability to sustain existing levels of profitability or to obtain future contract awards. In addition, if our cost estimates are too high, our Company's competitive position or reputation could be adversely affected.

**10. *We may be unable to respond to changes in consumer demands and market trends in a timely manner.***

Our success depends on our ability to identify, originate and define product and market trends, as well as to anticipate, gauge and react to rapidly changing consumer demands in a timely manner. Our products must also appeal to a broad range of customers whose preferences may vary. We cannot assure you that the demand for our products with end-consumers will continue to grow or that we will be able to continue to meet rapidly changing consumer demands in the future. If we misjudge the market or fail to anticipate a shift in consumer preferences, we may be faced with a reduction in revenues. Any inability to respond to changes in consumer demands and market trends in a timely manner could have a material adverse effect on our business, financial condition and results of operations.

**11. *We could become liable to customers, suffer adverse publicity and incur substantial costs as a result of defects in our products, which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity.***

Any failure or defect in our products could result in a claim against us for damages, regardless of our responsibility for such a failure or defect. Although we attempt to maintain quality standards, we cannot assure that all our products would be of uniform quality, meet the customer standards which in turn could adversely affect the value of our brand, and our sales could be diminished if we are associated with negative publicity. Also, our business is dependent on the trust our customers have in the quality of our products. Any negative publicity regarding our company, brand, or products or any other unforeseen events could affect our reputation and our results from operations.

**12. *Our Promoters plays a key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our promoters remain associated with us.***

We benefit from our relationship with our Promoters and our success depends upon the continuing services of our Promoter who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Our Promoters have been actively involved in the day-to-day operations and management. Accordingly, our performance is heavily dependent upon the services of our Promoters. If our Promoters are unable or unwilling to continue in his present position, we may not be able to replace them easily or at all. Our Promoters, have over the years-built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

***13. We require a number of approvals, NOCs, licenses, registrations and permits in the ordinary course of our business. Some of the approvals are required to be obtained by our Company and any failure or delay in obtaining the same in a timely manner may adversely affect our operations.***

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of “**Kalyani Cast-Tech Limited**” from “**Kalyani Cast-Tech Private Limited**”. Also, we are yet to receive and renew several approvals and licenses. Non-obtaining or non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further we require to keep already obtained valid key approvals such as Tax Registrations, Shops and Establishment Act License, for running our operations in a smooth manner. Further, our Company is unable to trace copy of its already obtained approval of Consent to Establish under the Water (Prevention & Control of Pollution) Act, 1974 and the Air (Prevention & Control of Pollution) Act, 1981. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business.

For further details, please see chapters titled “**Key Industry Regulations and Policies**” and “**Government and Other Statutory Approvals**” at pages 114 and 180 respectively of this Prospectus.

***14. We do not have firm commitment agreements with our customers. If our customers choose not to source their requirements from us, our business and results of operations may be adversely affected.***

We do not have firm commitment, long-term supply agreements with all our customers and instead rely on purchase orders to govern the volume and other terms of our sales of products. Many of the purchase orders we receive from our customers specify a price per unit and delivery schedule, and the quantities to be delivered are determined closer to the date of delivery. However, such orders may be amended or cancelled prior to finalisation, and should such an amendment or cancellation take place, it may adversely impact our production schedules and inventories. Further, where we have contracts with customers, such contracts do not bind our customers to provide us with a specific volume of business and can be terminated by our customers with or without cause, with little or no advance notice and without compensation. Consequently, there is no commitment on the part of the customer to continue to place new work orders with us and as a result, our sales from period to period may fluctuate significantly as a result of changes in our customers’ vendor preferences and we may be unable to procure repeat orders from our customers.

Cancellation by customers or delay or reduction in their orders or instances where anticipated orders fail to materialize can result in mismatch between our inventories of raw materials and of manufactured products, thereby increasing our costs relating to maintaining our inventory and reduction of our margins, which may adversely affect our profitability and liquidity. Further, we may not find any customers or purchasers for the surplus or excess capacity, in which case we would be forced to incur a loss. Further, our inability to find customers for surplus products may result in excessive inventories which may become obsolete and may be required to be written off in the future. Additionally, our customers have high and stringent standards for product quality and quantity as well as delivery schedules. Any failure to meet our customers’ expectations could result in the cancellation or non-renewal of contracts or purchase orders. There are also a number of factors, other than our performance that could cause the loss of a customer. Customers may demand price reductions, set-off any payment obligations, require indemnification for themselves or their affiliates, or replace their existing products with alternative products, any of which may have an adverse effect on our business, financial condition, results of operations and future prospects.

***15. The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted.***

The continuing effect of the COVID-19 pandemic on our business and operations is highly uncertain and cannot be predicted. In late calendar 2019, COVID-19, commonly known as “novel coronavirus” was first reported in Wuhan, China. Since then, the virus has progressively spread globally too many countries. The World Health Organization declared the COVID-19 outbreak as a health emergency of international concern on January 30, 2020 and thereafter categorised the outbreak as a pandemic on March 11, 2020. In order to contain the spread of COVID-19 virus, the Government of India initially announced a 21-day lockdown on March 24, 2020, which, after being subject to successive extensions, is being relaxed currently. During the duration of the lockdown, there were several restrictions in place including travel restrictions and directive to all citizens to not move out of their respective houses unless essential. Whilst the lockdown required private, commercial and industrial establishments to remain closed, subsequently manufacturing

units of essential commodities were permitted to be functional. The team members have been working from home during lockdown and have been able to execute their responsibilities and service clients without any disruption, difficulty or delay. Due to the rising number of infected cases of COVID-19 in the country, there is no certainty if additional restrictions will be put back in place or if another lockdown would be re-imposed to control the spread of the pandemic. We cannot assure you that we may not face any difficulty in our operations due to such restrictions and such a prolonged instance of lockdown may adversely affect our business, financial condition and results of operations.

Further, our ability to ensure the safety of our workforce and continuity of operations while conforming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the wellbeing of our employees. The ultimate impact will depend on a number of factors, many of which are outside our control. These factors include the duration, severity and scope of the pandemic, the impact of the pandemic on economic activity in India and globally, the eventual level of infections in India, and the impact of any actions taken by governmental bodies or health organisations (whether mandatory or advisory) to combat the spread of the virus. These risks could have an adverse effect on our business, results of operations, cash flows and financial condition. To the extent that the COVID19 pandemic adversely affects our business and operations, it may also have the effect of heightening many of the other risks described in this **“Risk Factors”** section.

***16. General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.***

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the sales of many of our products and services may decline.

***17. If we are unable to respond to the demands of our existing and new clients, or adapt to technological changes or advances, our business and growth could be adversely affected.***

Our industry is characterized by increasingly new and changing business models and rapid technological and regulatory changes. Our clients' needs and demands for our products evolve with these changes. Our future success will depend, in part, on our ability to respond to our clients' demands for new products, capabilities and technologies on a timely and cost-effective basis. We also need to adapt to technological advancements and keep pace with changing regulatory standards to address our clients' increasingly sophisticated requirements. If we fail to adapt or keep pace with new technologies in a timely manner, provide customers with better products and services and user experience, or retain and attract skilled technology staff, it could harm our ability to compete, decrease the value of our products and services to our clients, and adversely affect our business and future growth.

***18. Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.***

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund-based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled **“Financial Indebtedness”** beginning on page 173 of this Prospectus.

**19. Major fraud, lapses of internal control or system failures could adversely impact the company's business.**

Our Company is vulnerable to risk arising from the failure of employees to adhere to approved procedures, system controls, fraud, system failures, information system disruptions, communication systems failure and interception during transmission through external communication channels or networks. Failure to protect fraud or breach in security may adversely affect our Company's operations and financial performance. Our reputation could also be adversely affected by significant fraud committed by our employees, agents, customers or third parties.

**20. We have not applied for registration of our name and logo and do not own the trademark legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.**

We have not applied for registration of our name and logo under the provisions of the Trademarks Act, 1999 and do not own the trademark as on date. As such we do not enjoy the statutory protections accorded to a registered trademark as on date. We are in the process of filing an application with the Trade Marks Registry, for registration of our logo and corporate name under the provisions of the Trade Marks Act, 1999. There can be no assurance that we will be able to register the trademark and the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill.

Further, we cannot assure you that any application for registration of our trademark in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

**21. We have had certain inaccuracy in relation to regulatory filings to be made with the RoC and our company has made non-compliances of certain provision under applicable laws**

Our Company has overlooked to comply with certain statutory provisions in the past including but not limited to the details as mentioned in this risk factor. There are few discrepancies noticed in some of our corporate records relating to adhering with the provisions of SS-1 and SS-2 of the Companies Act, 2013, however, upon identifying such non-compliance, the company adhered with the provisions of SS-1 and SS-2 of Companies Act, 2013. Our Company failed to comply with few of the provisions of Section 12(3) (a) and (c) of the Companies Act, 2013 by not mentioning Corporate Identity Number along with telephone number, fax number, e-mail and website addresses of the company on its business letters, and billheads. Upon identification of the said non-compliances the company has adhered to the provision mentioned in section 12.

In addition, there are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies. The discrepancies pertain to e-forms and attachments which contains certain clerical errors and inadequate disclosures. Further, some of the attachments are not duly signed, stamped or on the letterhead of the Company. Also, our Company has failed to file some of the e-forms within prescribed time, the same were later filed by paying additional fees. However, upon identification of the above compliances, the Company ensured to adhered to all provisions and do the needful within the prescribed time limit.

Valuation report pertaining to transfer of shares of the Company are not available with the Company and various transfer of shares between our promoter/director and public shareholders have happened at a price which is lower than the Issue price.

While no legal proceedings or regulatory action has been initiated against our Company in relation to such non-compliance or instances of non-filings or incorrect filings or delays in filing statutory forms with the RoC as of the date of this Prospectus, we cannot assure you that such legal proceedings or regulatory actions will not be initiated against our Company in future and we cannot assure you that we will not be subject to penalties imposed by concerned regulatory authorities in this respect. Therefore, if the authorities impose monetary penalties on us or take certain punitive actions against our Company in relation to the same, our business, financial condition and results of operations could be adversely affected.

**22. If we are not able to compete successfully against existing and new competitors, we may lose customers and market share as well as reduce our margins.**

The product segments in which we operate are mature and highly competitive in India, as a limited number of large manufacturers compete for consumer acceptance. Competition is based upon brand perceptions, product performance and innovation, customer service and price. In particular, this competition may affect our ability to bid competitively for supply contracts with the Indian Railways and other government bodies which are awarded pursuant to competitive bidding processes. In accordance with the prevailing procurement policies of the Indian Railways, a certain proportion of

these contracts are awarded to the lowest bidder. Some of our competitors which operate on a relatively smaller base and any new entrants to the industry may be willing to reduce their margins in order to gain market share and may lower their bid values for securing these contracts.

Our ability to compete effectively may be affected by factors such as:

- our competitors may have substantially greater financial, marketing, research and development and other resources and greater market share in certain segments than we do, which could provide them with greater scale and negotiating leverage with distributors, and suppliers;
- our competitors may have lower manufacturing, sales and distribution costs, and higher profit margins, which may enable them to offer aggressive retail discounts and other promotional incentives.

Any failure by us to compete effectively, including in terms of pricing or providing quality products, could have a material adverse effect on our business, results of operations and financial condition. Our ability to compete successfully will depend, in significant part, on our ability to reduce costs by such means as leveraging global purchasing, improving productivity, elimination of redundancies and increasing manufacturing at low-cost supply sources. If we are unable to compete successfully, our market share may decline, which may have a material adverse effect on our results of operations and financial condition.

***23. Orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations.***

We may encounter problems in executing the orders in relation to our products, or executing it on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such products or cause its cancellation. Due to the possibility of cancellations or changes in scope and schedule of delivery of such products, resulting from our customers' discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such products can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

***24. Further any defaults or delays in payment by a significant portion of our customers, may have an adverse effect on cash flows, results of operations and financial condition.***

In the ordinary course of business, we extend credit to our customers. Our results of operations and profitability depend on the credit worthiness of our customers. Certain of these customers may have weak credit histories and we cannot assure that these counterparties will always be able to pay us in a timely fashion, or at all. Any adverse change in the financial condition of our customers may adversely affect their ability to make payments to us. Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition. Default or delays in payments by a significant portion of our customers may have an adverse effect on cash flows, results of operations and financial condition.

***25. Our inability to manage growth could disrupt our business and reduce our profitability. We propose to expand our business activities in coming financial years.***

We expect our future growth to place significant demands on both our management and our resources. This will require us to continuously evolve and improve our operational, financial and internal controls across the organisation. In particular, continued expansion increases the challenges we face in:

- Our ability to acquire and retain clients for our products;
- Services, products or pricing policies introduced by our competitors;
- Capital expenditure and other costs relating to our operations;
- The timing and nature of, and expenses incurred in, our marketing efforts;
- Recruiting, training and retaining sufficient skilled technical and management personnel;
- Adhering to our high quality and process execution standards;

- Maintaining high levels of customer satisfaction;
- Developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

You should not rely on yearly comparisons of our results of operations as indicators of future performance. It is possible that in some future periods our results of operations may be below the expectations of public, market analysts and investors. If we are unable to manage our growth it could have an adverse effect on our business, results of operations and financial condition.

**26. Our funding requirements and the deployment of Net Proceeds are based on management estimates and have not been independently appraised. Further, our management will have discretion in the application of the Net Proceeds, and there is no assurance that the Objects of the Issue will be achieved within the time frame expected or at all.**

We intend to use the Net Proceeds for the purposes described under “Objects of the Issue” on page 74. The Objects of the Issue include funding of working Capital Requirements of our company amounting upto ₹ 2,375.00 Lakh, and general corporate purposes amounting to ₹ 297.22 Lakh. Our funding requirements and the deployment of the Net Proceeds are based on management estimates for which we have relied on internal assumptions and such assumptions have not been appraised by any independent agency. The Net Proceeds may be used to repay / prepay such term and / or working capital loans. While we believe that utilization of Net Proceeds for repayment of loans would help us to reduce our cost of debt and enable the utilization of our internal accruals for further investment in business growth and expansion, the repayment of loans will not result in the creation of any tangible assets for our Company. Given the nature of our business and due to various uncertainties involved, we may be unable to utilize the Net Proceeds within the time frame or as per the schedule of deployment that we currently estimate. In the case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by means available to us, including internal accruals and additional equity and / or debt arrangements.

**27. Our Company has a negative cash flow from investing activities in the period ended on June 30, 2023 and past 3 financial years and Financing Activities in the financial year ending on March 31, 2022 and 2021, details of which are given below. Sustained negative cash flow could impact our growth and business.**

Our Company had negative cash flows from our investing activities and financing activities in the previous year(s) as per the Restated Financial Statements and the same are summarized as under:

	<i>(₹ in lakh)</i>			
Particulars	June 30, 2023	March 31, 2023	March 31, 2022	March 31, 2021
Net Cash from Operating Activities	231.69	402.93	574.10	38.22
Net Cash from Investing Activities	(107.87)	(55.62)	(187.74)	(49.44)
Net Cash from Financing Activities	237.80	54.42	(259.86)	(21.75)
Net Increase / (Decrease) in Cash & Cash Equivalents	361.62	401.73	126.50	(32.97)

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans, and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations.

**28. If we are unable to source business opportunities effectively, we may not achieve our financial objectives.**

Our ability to achieve our financial objectives will depend on our ability to identify, evaluate and accomplish business opportunities. To grow our business, we will need to hire, train, supervise and manage new employees and to implement systems capable of effectively accommodating our growth. However, we cannot assure you that any such employees will contribute to the success of our business or that we will implement such systems effectively. Our failure to source business opportunities effectively could have a material adverse effect on our business, financial condition and results of operations. It is also possible that the strategies used by us in the future may be different from those presently in use. No assurance can be given that our analyses of market and other data or the strategies we use or plans in future to use will be successful under various market conditions.

**29. Brand recognition is important to the success of our business, and our inability to build and maintain our brand names will harm our business, financial condition and results of operation.**

Brand recognition is important to the success of our business. Establishing and maintaining our brand name in the industry or for people relying on products is critical to the success of the customer acquisition process of our business. Although,

we expect to allocate significant amount of resources, financial and otherwise, on establishing and maintaining our brands, no assurance can be given that our brand names will be effective in attracting and growing user and client base for our businesses or that such efforts will be cost-effective, which may negatively affect our business, financial condition and results of operations.

***30. Significant disruptions in our information technology systems or breaches of data security could adversely affect our business and reputation.***

We may also face cyber threats such as: (i) Phishing and Trojans – targeting our customers, wherein fraudsters send unsolicited codes or mails to our customers seeking account sensitive information or to infect customer machines to search and attempt ex-filtration of account sensitive information; (ii) Hacking – wherein attackers seek to hack into our infrastructure with the primary intention of causing reputational damage to us by disrupting services; (iii) Data theft – This can be internal i.e. by someone who has access to data of our Company or external wherein unconnected cyber criminals may attempt to intrude into our network with the intention of stealing our data or information; and (iv) Advanced persistent threat – a network attack in which an unauthorized person gains access to our network and remains undetected for a long period of time. In the event of a significant decline in the demand for our products, our business, results of operations and financial condition may be materially and adversely affected.

Our systems are potentially vulnerable to data security breaches, whether by our employees, or our service providers or others that may expose sensitive data to unauthorized persons. We process and transfer data, including personal information, financial information and other confidential data provided to us by our clients. Although we maintain systems and procedures to prevent unauthorized access and other security breaches, it is possible that unauthorized individuals could improperly access our systems, or improperly obtain or disclose sensitive data that we process or handle. Data security breaches could lead to the loss of intellectual property or could lead to the public exposure of personal information (including sensitive financial and personal information) of our clients' investors or our employees. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and reputation.

***31. The nature of our business exposes us to liability claims and contract disputes and our indemnities may not adequately protect us. Any liability in excess of our reserves or indemnities could result in additional costs, which would reduce our profits.***

Time is often of the essence in our business work. In the event there are delays in our current or future products, we will not be able to get extensions from our customers. Further, in some contracts, in case of delay due to deficiency in products by us, clients may have the right to complete the work at our risk and cost by engaging a third party. In the event we fail to perform under the terms of a particular contract, that could adversely affect our financial conditions and business operations. Failure to effectively cover ourselves against any of these reasons could expose us to substantial costs and potentially lead to material losses. In addition, if there is a customer dispute regarding our performance or workmanship, the customer may delay or withhold payment to us.

***32. Employee fraud or misconduct could harm us by impairing our ability to attract and retain clients and subject us to significant legal liability and reputational harm.***

Our business is exposed to the risk of employee misappropriation, fraud or misconduct. Our employees could make improper use or disclose confidential information, which could result in regulatory sanctions and serious reputational or financial harm. While we strive to monitor, detect and prevent fraud or misappropriation by our employees, through various internal control measures, we may be unable to adequately prevent or deter such activities in all cases. Our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. While we have not been able to identify such issues in the past, there could be instances of fraud and misconduct by our employees, which may go unnoticed for certain periods of time before corrective action is taken. In addition, we may be subject to regulatory or other proceedings, penalties or other actions in connection with any such unauthorized transaction, fraud or misappropriation by our agents or employees, which could adversely affect our goodwill, business prospects and future financial performance. We may also be required to make good any monetary loss to the affected party. Even when we identify instances of fraud and other misconduct and pursue legal recourse or file claims with our insurance carriers, we cannot assure you that we will recover any amounts lost through such fraud or other misconduct.

***33. The average cost of acquisition of Equity Shares by our Promoters is lower than the issue price.***

Our Promoter' average cost of acquisition of Equity Shares in our Company is lower than the Issue Price as decided by the Company in consultation with the Book Running Lead Manager. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer chapter title "***Capital Structure***" beginning on page 63 of this Prospectus.

**34. We have entered into related party transactions in the past and may continue to do so in the future.**

Our Company has entered into various transactions with our Promoters. While we believe that all such transactions are conducted on arm's length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions were not entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operation. For details on the transactions entered by us, please refer to chapter "**Related Party Transactions**" beginning on page 155 of this Prospectus.

**35. Our Promoters and promoters group will continue to retain majority control over the Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval.**

Upon completion of the Issue, our Promoters and Promoters Group will own upto #69.83% of the Post-Issue Equity Share capital of the Company. As a result, the Promoters and Promoter Group will have the ability to exercise significant influence over all matters requiring shareholders' approval, including the election of directors and approval of significant corporate transactions. The Promoters and Promoter Group will also have an effective veto power with respect to any shareholder action or approval requiring a majority vote. Such concentration of ownership may also have the effect of delaying, preventing or deterring a change in control. For further details of Promoter' shareholding, please refer chapter titled "**Capital Structure**" beginning on Page No. 63 of this Prospectus.

*#Subject to finalization of the Basis of Allotment*

**36. We are still in process of compiling information of creditors**

As on the date of filing of the Prospectus, our Company is still in the process of compiling information with respect to Total Outstanding Due to MSME Creditor. Further, details pertaining to amounts due towards our creditors are not available on the website of our Company. Our inability to accurately forecast the total number of MSME Creditor and total amount due to them could adversely affect our business operations and cash flows and also affect our ability to continue to manage and expand our business.

**37. We are dependent on a number of Key Managerial Personnel and our senior management, and the loss of, or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.**

Our performance depends largely on the efforts, expertise and abilities of our Key Managerial Personnel, senior management, and our operational personnel who possess significant experience in the industry in which we operate. We believe that the inputs and experience of our KMP and senior management, in particular, and other key personnel are valuable for the development of our business, operations and the strategic directions taken by our Company. We cannot assure you that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. Moreover, we may be required to substantially increase the number of our qualified personnel in connection with any future growth plans, and we may face difficulty in doing so due to the intense competition in the technology industry for such personnel. We may also be required to increase our levels of employee compensation more rapidly than in the past in order to remain competitive in retaining.

Further, the COVID -19 pandemic has dynamically altered the approach on workplace hygiene and safety and continuity of operations while confirming with measures implemented by the central and state governments in relation to the health and safety of our employees may result in increased costs. In the event a member or members of our senior management team contract COVID-19, it may potentially affect our operations. Further, in the event any of our employees' contract COVID-19, we may be required to quarantine our employees and shut down a part of or the entire operating facility as necessary. Risks arising on account of COVID-19 can also threaten the safe operation of our facility, loss of life, injuries and impact the well-being of our employees.

**38. Our operating expenses include overheads that may remain fixed in the medium term. In case there is any decline in our operating performance, we may be unable to reduce such expenses.**

Our operating expenses include various fixed costs, which are as such, not dependent on sales revenue. Any shortfall in sales may cause significant variations in operating results in any particular quarter, as we would not be able to reduce our fixed operating expenses in the short term. The effect of any decline in sales may thereby be magnified because a portion of our earnings are committed to paying these fixed costs. Accordingly, we believe that period-to-period comparisons of our results may not necessarily give a correct presentation of the performance and should not be relied upon as indications of future performance.

**39. *The shortage or non-availability of power facilities may adversely affect our business processes and have an adverse impact on our results of operations and financial condition.***

Our business processes require substantial amount of power facilities. We do not have arrangements for alternative / independent sources of power supply as of now. We are mainly dependent on local electricity service provider for meeting our electricity requirements, there may be factors beyond our control affecting the supply of power. Any power failure may lead to increased costs, thereby affecting the profitability.

**40. *Our insurance coverage may not adequately protect us against losses, and successful claims against us that exceed our insurance coverage could harm our results of operations and diminish our financial position.***

We maintain insurance coverage of the type and in the amounts that we believe are commensurate with our operations. Our insurance policies, however, may not provide adequate coverage in certain circumstances and may be subject to certain deductibles, exclusions and limits on coverage. In addition, there are various types of risks and losses for which we do not maintain insurance, such as losses due to business interruption and natural disasters, because they are either uninsurable or because insurance is not available to us on acceptable terms. A successful assertion of one or more large claims against us that exceeds our available insurance coverage or results in changes in our insurance policies, including premium increases or the imposition of a larger deductible or co-insurance requirement, could adversely affect our business, future financial performance and results of operations.

**41. *There are no alternate arrangements for meeting our requirements for the Objects of the Issue. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our working capital requirements through our owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not yet identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue Proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer chapter titled “*Objects of the Issue*” on page 74 of this Prospectus.

**42. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Additionally, under some of our loan agreements, we may not be permitted to declare any dividends, if there is a default under such loan agreements or unless our Company has paid all the dues to the lender up to the date on which the dividend is declared or paid or has made satisfactory provisions thereof. Accordingly, realization of a gain on shareholder’s investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “*Dividend Policy*” on page 156 of this Prospectus.

**43. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm the results of operations and our financial condition.***

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, through collaborations, tie-ups, strategic alliances, partnerships or joint venture across the country and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and negotiating with several potential partners, we have not entered into any definitive agreements. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management’s time and focus from operating our business to addressing challenges pertaining to acquisition and integration. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realize the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

**44. *Our future funds requirements, in the form of fresh issue of capital or securities and / or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.***

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

**45. *Our lenders have imposed certain restrictive conditions on us under our financing arrangements. Under our financing arrangements, we are required to obtain the prior, written lender consent for, among other matters, changes in our capital structure, and formulation of a scheme of amalgamation or reconstruction and entering into any other borrowing arrangement. Further, we are required to maintain certain financial ratios.***

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain the consents necessary to take the actions we believe are necessary to operate and grow our business. Our level of existing debt and any new debt that we incur in the future has important consequences. Any failure to comply with these requirements or other conditions or covenants under our financing agreements that are not waived by our lenders or are not otherwise cured by us, may require us to repay the borrowing in whole or part and may include other related costs. Our Company may be forced to sell some or all of its assets or limit our operations. This may adversely affect our ability to conduct our business and impair our future growth plans. Though these covenants are restrictive to some extent to the Company however it ensures financial discipline, which would help the Company in the long run to improve its financial performance.

For further information, see the chapter titled “*Statement of Financial Indebtedness*” on page 173 of this Prospectus.

**46. *Certain Agreements / deeds may be in the previous name of the company.***

Our certain agreements and deeds may be in the name of the erstwhile name of the company i.e., Kalyani Cast-Tech Private Limited. In case we fail to change the name in the agreements and deeds, it may cause adverse effect on Our company’s business.

**47. *Reliance has been placed on declarations and affidavits furnished by our Directors and Key Management Personnel, for details of their work experience and qualification included in this Prospectus.***

Our Directors and Key Management Personnel have been unable to trace copies of certain documents pertaining to their work experience and qualification. Accordingly, reliance has been placed on an affidavit furnished by them to disclose such details in this Prospectus and neither we, nor the Book Running Lead Manager have been able to independently verify these details in the absence of primary documentary evidence. Further, there can be no assurances that they will be able to trace the relevant documents pertaining to their work experience and qualification in the future, or at all. Therefore, we cannot assure you that all or any of the information relating to the work experience and qualification of our Directors and Key Management Personnel in chapter “*Our Management*” beginning on page 127 of this Prospectus is complete, true and accurate.

**48. *There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all.***

In accordance with Indian law and practice, permission to list the Equity Shares will not be granted until after the Equity Shares have been issued and allotted. Approval will require all other relevant documents authorizing the issuing of our Equity Shares to be submitted. There could be a failure or delay in listing our Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

**49. *Excessive reliance on our information technology systems and their failure could harm our relationship with customers, expose us to lawsuits or administrative sanctions or otherwise adversely affect our provision of products to customers and our internal operation.***

As part of our business strategy, we use high quality of information technology system to deliver our products in the best possible way. We have an exemplary track record for completion of the projects within the stipulated time period but there may be the system interruptions, errors, or downtime which could result from a variety of causes including changes in technology, technology failure, changes in system, and power failure etc. these may affect our business adversely.

**50. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of Our Company.***

Since, the Issue size is less than ₹10,000 Lakhs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised from this Issue, is hence, at the discretion of the management and the Board of Directors of Our Company and Our Company's management will have flexibility in applying the proceeds of the Issue and will not be subject to monitoring by any independent agency. The fund requirement and deployment mentioned in the Objects of the Issue is based on internal management estimates and have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Audit Committee will monitor the utilization of the proceeds of this Issue and prepare the statement for utilization of the proceeds of this Issue. Also, in accordance with Section 27 of the Companies Act, 2013, a company shall not vary the objects of the Issue without the Company being authorized to do so by our shareholders by way of special resolution and other compliances as applicable in this regard. Our Promoters and controlling shareholders shall provide exit opportunity to such shareholders who do not agree to the proposal to vary the objects, at such price, and in such manner, as may be prescribed by SEBI, in this regard.

***51. Negative publicity could adversely affect our revenue model and profitability.***

We work in the market where trust of the customers on us and upon the products provided by us matters a lot. Any negative publicity regarding our company or the products provided by the company due to any other unforeseen events may affect our reputation and image which leads to the adverse effect on our business and goodwill as well.

***52. Industry information included in this Prospectus has been derived from industry reports commissioned by us for such purpose. There can be no assurance that such third-party statistical, financial and other industry information is either complete or accurate.***

Statements from parties that involve estimates are subject to change, and actual amounts may differ materially from those included in this Prospectus.

***53. The requirements of being a public listed company may strain our resources and impose additional requirements.***

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a half yearly basis. In order to meet our financial control and disclosure obligations, significant resources band management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and / or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

**Issue Specific Risks:**

***54. There are restrictions on daily / weekly / monthly movements in the price of the Equity Shares, which may adversely affect a shareholders' ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Once listed, we would be subject to circuit breakers imposed by all stock exchanges in India, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker

in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

**55. *After this Issue, the price of the Equity Shares may be highly volatile, or an active trading market for the Equity Shares may not develop.***

The price of the Equity Shares on the Stock Exchanges may fluctuate as a result of the factors, including:

- Volatility in the Indian and global capital market;
- Company's results of operations and financial performance;
- Performance of Company's competitors,
- Adverse media reports on Company or pertaining to the agriculture Industry;
- Changes in our estimates of performance or recommendations by financial analysts;
- Significant developments in India's economic and fiscal policies; and
- Significant developments in India's environmental regulations.

There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the price at which the Equity Shares are initially traded will correspond to the price at which the Equity Shares will trade in the market subsequent to this Issue.

**56. *You will not be able to sell immediately on Stock Exchange any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.***

## **EXTERNAL RISKS**

### **Industry Related Risks:**

***59. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.***

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended / changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

***60. Malpractices by some players in the industry affect overall performance of emerging Companies***

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

### **OTHER RISKS:**

***61. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws and regulations, capital gains arising from the sale of equity shares in an Indian Company are generally taxable in India. Any gain on the sale of shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the securities transaction tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are sold. Any gain on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a stock exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain on the sale of shares held for a period of 12 months or less will be subject to capital gains tax in India. Further, any gain on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1<sup>st</sup> day of October 2004 shall be available only if the acquisition of share is chargeable to Securities Transactions Tax (STT) under Chapter VII of the Finance (No 2) Act, 2004. In case this provision becomes effective, sale shares acquired on or after 1<sup>st</sup> day of October 2004 on which STT was not charged will attract tax under provisions of Long-Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1<sup>st</sup> day of April 2018 if the long-term capital gains exceeds ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1<sup>st</sup> day of April 2018 in excess of ₹ 1,00,000/- pa. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

***62. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Prospectus.***

As stated in the reports of the Auditor included in this Prospectus under chapter “*Financial Statements as Restated*” beginning on page 157 the financial statements included in this Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Prospectus. Accordingly, the degree to which the financial information included in this Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBIICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Prospectus should accordingly be limited.

***63. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

***64. Financial instability in Indian Financial Markets could adversely affect our Company’s results of operation and financial condition.***

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company’s business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

***65. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in this Prospectus.***

While facts and other statistics in this Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Our Industry*” beginning on page 90 of this Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

***66. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

***67. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

***68. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.***

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

***69. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.***

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

***70. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

#### GLOBAL ECONOMY AT LARGE

##### Near-Term Resilience, Persistent Challenges

- Global growth is projected to fall from an estimated 3.5 percent in 2022 to 3.0 percent in both 2023 and 2024. While the forecast for 2023 is modestly higher than predicted in the April 2023 World Economic Outlook (WEO), it remains weak by historical standards. The rise in central bank policy rates to fight inflation continues to weigh on economic activity. Global headline inflation is expected to fall from 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024. Underlying (core) inflation is projected to decline more gradually, and forecasts for inflation in 2024 have been revised upward.
- The recent resolution of the US debt ceiling standoff and, earlier this year, strong action by authorities to contain turbulence in US and Swiss banking, reduced the immediate risks of financial sector turmoil. This moderated adverse risks to the outlook. However, the balance of risks to global growth remains tilted to the downside. Inflation could remain high and even rise if further shocks occur, including those from an intensification of the war in Ukraine and extreme weather-related events, triggering more restrictive monetary policy. Financial sector turbulence could resume as markets adjust to further policy tightening by central banks. China's recovery could slow, in part as a result of unresolved real estate problems, with negative cross-border spillovers. Sovereign debt distress could spread to a wider group of economies. On the upside, inflation could fall faster than expected, reducing the need for tight monetary policy, and domestic demand could again prove more resilient.
- In most economies, the priority remains achieving sustained disinflation while ensuring financial stability. Therefore, central banks should remain focused on restoring price stability and strengthening financial supervision and risk monitoring. Should market strains materialize, countries should provide liquidity promptly while mitigating the possibility of moral hazard. They should also build fiscal buffers, with the composition of fiscal adjustment ensuring targeted support for the most vulnerable. Improvements to the supply side of the economy would facilitate fiscal consolidation and a smoother decline of inflation toward target levels.

##### Forces Shaping the Outlook

The global recovery from the COVID-19 pandemic and Russia's invasion of Ukraine is slowing amid widening divergences among economic sectors and regions.

The World Health Organization (WHO) announced in May that it no longer considers COVID-19 to be a "global health emergency." Supply chains have largely recovered, and shipping costs and suppliers' delivery times are back to pre-pandemic levels. But forces that hindered growth in 2022 persist. Inflation remains high and continues to erode household purchasing power. Policy tightening by central banks in response to inflation has raised the cost of borrowing, constraining economic activity. Immediate concerns about the health of the banking sector have subsided, but high interest rates are filtering through the financial system, and banks in advanced economies have significantly tightened lending standards, curtailing the supply of credit. The impact of higher interest rates extends to public finances, especially in poorer countries grappling with elevated debt costs, constraining room for priority investments.

As a result, output losses compared with pre-pandemic forecasts remain large, especially for the world's poorest nations. Despite these headwinds, global economic activity was resilient in the first quarter of 2023, with that resilience driven mainly by the services sector. The post-pandemic rotation of consumption back toward services is approaching completion in advanced economies (including in tourism-dependent economies of southern Europe), and it accelerated in a number of emerging market and developing economies in the first quarter (Figure 1). However, as mobility returns to pre-pandemic levels, the scope for further acceleration appears more limited.

At the same time, non-services sectors, including manufacturing, have shown weakness, and high-frequency indicators for the second quarter point to a broader slowdown in activity. Amid softening consumption of goods, heightened uncertainties regarding the future geoeconomic landscape, weak productivity growth, and a more challenging financial environment, firms have scaled back investment in productive capacity. Gross fixed capital formation and industrial production have slowed sharply or contracted in major advanced economies, dragging international trade and manufacturing in emerging markets with them. International trade and indicators of demand and production in manufacturing all point to further weakness. Excess savings built up during the pandemic are declining in advanced economies, especially in the United States, implying a slimmer buffer to protect against shocks, including those to the cost of living and those from more restricted credit availability.

### Core Inflation Declining More Gradually Than Headline Inflation

Global headline inflation is set to fall from an annual average of 8.7 percent in 2022 to 6.8 percent in 2023 and 5.2 percent in 2024, broadly as projected in April, but above pre-pandemic (2017–19) levels of about 3.5 percent. About three-quarters of the world's economies are expected to see lower annual average headline inflation in 2023. Monetary policy tightening is expected to gradually dampen inflation, but a central driver of the disinflation projected for 2023 is declining international commodity prices. Differences in the pace of disinflation across countries reflect such factors as different exposures to movements in commodity prices and currencies and different degrees of economic overheating. The forecast for 2023 is revised down by 0.2 percentage point, largely on account of subdued inflation in China. The forecast for 2024 has been revised upward by 0.3 percentage point, with the upgrade reflecting higher-than-expected core inflation.

Core inflation is generally declining more gradually. Globally, it is set to decline from an annual average of 6.5 percent in 2022 to 6.0 percent in 2023 and 4.7 percent in 2024. It is proving more persistent than projected, mainly for advanced economies, for which forecasts have been revised upward by 0.3 percentage point for 2023 and by 0.4 percentage point for 2024 compared with the April 2023 WEO. Global core inflation is revised down by 0.2 percentage point in 2023, reflecting lower-than-expected core inflation in China, and up by 0.4 percentage point in 2024. On an annual average basis, about half of economies are expected to see no decline in core inflation in 2023, although on a fourth-quarter-over-fourth-quarter basis, about 88 percent of economies for which quarterly data are available are projected to see a decline. Overall, inflation is projected to remain above target in 2023 in 96 percent of economies with inflation targets and in 89 percent of those economies in 2024.

### Policy Priorities

Conquer inflation. Central banks in economies with elevated and persistent core inflation should continue to clearly signal their commitment to reducing inflation. A restrictive stance—with real rates above neutral—is needed until there are clear signs that underlying inflation is cooling. Multilayered uncertainty complicates the task for central banks: Levels of neutral rates and lags of policy transmission are difficult to estimate with confidence, and the potency of the transmission mechanism may differ across economic sectors. In view of these uncertainties, adjusting policy in a data-dependent manner and avoiding a premature easing before price pressures have adequately receded is warranted, while continuing to use tools to maintain financial stability when needed. Although the primary responsibility for restoring price stability lies with central banks, legislated government spending cuts or tax increases aimed at ensuring public debt sustainability

can, by reducing aggregate demand and reinforcing the overall credibility of disinflation strategies, further ease inflation. This is especially the case in countries with overheated economies and steep inflation-unemployment trade-offs.

Maintain financial stability and prepare for stress. The fast pace of monetary policy tightening continues to put the financial sector under pressure. Strengthened supervision (by implementing Basel III and removing forbearance measures) and monitoring risks to anticipate further episodes of banking sector stress is warranted. The intensity of supervision must be commensurate with banks' risks and systemic importance, and it is essential to address oversight gaps in the nonbank financial sector. Macroprudential policy measures could be employed preemptively to address emerging risks in banks and nonbank financial institutions. Where market strains emerge, deploying tools that provide liquidity support promptly and forcefully, while mitigating the risk of moral hazard, would limit contagion. Because central banks are not equipped to deal with insolvency problems, it is important for governments to rebuild fiscal space in the event real resources need to be mobilized. Countries at risk of external shocks can make full use of the global financial safety net afforded by international financial institutions, including IMF precautionary financial arrangements.

Rebuild fiscal buffers while protecting the vulnerable. With fiscal deficits and government debt above pre-pandemic levels, credible medium-term fiscal consolidation is in many cases needed to restore budgetary room for maneuver and ensure debt sustainability. Fiscal adjustment is currently projected International Monetary Fund | July 2023 9 to average 0.5 percent of GDP in 2024 (based on the change in structural fiscal balances) in both advanced economies and emerging market and developing economies. For economies with access to international markets, the pace of fiscal consolidation should depend on the strength of private demand. The composition of fiscal adjustment should protect targeted support for the most vulnerable. Phasing out untargeted fiscal measures, including those that blunt price signals such as energy subsidies is warranted, especially since energy prices have broadly returned to pre-pandemic levels. In cases in which countries are in or at high risk of debt distress, achieving debt sustainability may require not only well-timed fiscal consolidation, but also debt restructuring.

## GLOBAL FINANCIAL STABILITY UPDATE

Financial markets appear sanguine, and financial conditions have mostly continued to ease. Since the April 2023 Global Financial Stability Report, central banks have communicated that they could need to tighten monetary policy further. Even as yield curves remain inverted and recession concerns are prominent, financial conditions have mostly eased (Figure 1.1). A rally in the technology sector and higher equity prices, undoing some of the disinflationary impulses from tighter monetary policy, has supported this easing. In such circumstances, upside surprises to inflation could cause a sudden, sharp repricing of financial assets. The resulting tightening in global financial conditions could then interact with existing vulnerabilities in the financial system, which could amplify the tightening. Immediate concerns about the banking sector have eased, but growth in bank loans in advanced economies has slowed, and high interest rates will likely lead to tighter credit conditions. The shift of deposits in the United States from regional to large banks and money market funds has subsided, but a tighter monetary environment continues to challenge banks and nonbank financial intermediaries. In the euro area, mandatory repayments of loans from targeted longer-term refinancing operations are confronting banks that had relied on this source of funding, whereas in the United States, ongoing quantitative tightening and issuance of large amounts of Treasury bills after the recent debt ceiling episode could lead to further outflows from the banking system. In the meantime, the quality of business borrowers' credit is weakening as higher rates are starting to bite, raising credit costs, further curtailing bank lending, and slowing corporate debt issuance. Moreover, falling prices for commercial real estate—particularly office space—and residential property in many jurisdictions could add to pressures on indebted households and firms and weaken nonbank financial institutions exposed to vulnerable sectors. Major emerging markets have generally remained resilient in this uncertain environment and largely avoided the banking sector turmoil in March 2023. However, many lower-rated issuers of sovereign bonds in emerging and frontier markets are still struggling to maintain access to international markets. In the second quarter, spreads for investment-grade sovereigns have stayed at about average historical levels, while spreads on those below investment grade have remained well above the historical range for issuances (880 basis points). Notably, 18 countries have spreads

at distressed levels (more than 1,000 basis points). These high spreads have made issuance of new hard-currency debt very challenging for frontier markets so far in 2023 (Figure 1.2).

## INDIAN INDUSTRY OVERVIEW

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

## MARKET SIZE

India's nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise

exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

## RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- Merchandise exports in September 2022 stood at US\$ 32.62 billion.
- PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).

## GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- In August 2022, a Special Food Processing Fund of Rs. 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of Rs. 5,963 crore (US\$ 747.64 million).
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.

## ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

## RAILWAY INDUSTRY IN INDIA

### INTRODUCTION

The Indian railway system is regarded as the foundation and lifeblood of the economy. Indian railways span over thousands of kilometers practically covering the entire nation, making it the fourth largest in the world after the US, China and Russia. The Railways Board, which has a monopoly over the provision of rail services in India, is in charge of overseeing the whole infrastructure. Due to its low cost and effective operations, railways continue to be the most popular means of transportation for the majority of Indians when travelling long distances.

India's railway network is recognized as one of the largest railway systems in the world under single management. The railway network is also ideal for long-distance travel and movement of bulk commodities, apart from being an energy efficient and economic mode of conveyance and transport. Indian Railways is the preferred carrier of automobiles in the country.

Government of India has focused on investing in railway infrastructure by making investor-friendly policies. It has moved quickly to enable Foreign Direct Investment (FDI) in railways to improve infrastructure for freight and high-speed trains. At present, several domestic and foreign companies are also looking to invest in Indian rail projects.

India has the fourth largest railway network with over 22,593 operating trains (9,141 freight and 13,452 passengers) with a daily passenger count of 24 million passengers and 203.88 million tonnes of freight. In FY22 passenger traffic stood at 3.54 billion as compared to 1.28 billion in FY21. In FY23, railway freight volume stood at 1,109.38 MT which depicted year-on-year growth of 8%. Since August 2020, the Indian Railways has run 450 Kisan Rail services and was able to transport over 1.45 lakh tonnes of agricultural produce & perishables RailTel, a PSU under the Railway Ministry, which provides fast and free Wi-Fi across the In November 2020, India Railways announced that 40% of dedicated freight corridor (DFC) will be opened for traffic by end-FY21. India is among the top three exporters of railways globally as of 2022. India's export of railways has grown at a CAGR of 31.51% during 2010-18 to US\$ 507.90 million. Exports of railways in 2021 stood at US\$ 633.27 million. Indian

Railways is developing and creating technology in areas such as signalling and telecommunication with 15,000 kms being converted into automatic signalling and 37,000 kms to be fitted with 'KAVACH', the domestically developed Train Collision Avoidance System.

### GOVERNMENT INITIATIVES

The Government of India has adopted few initiatives for the Railways sector in the recent past, some of these are as follows:

Under the Union Budget 2023-24, capital outlay of Rs. 2.40 lakh crore (US\$ 29 billion) has been allocated to the Ministry of Railways, which is the highest ever outlay and about nine times the outlay made in 2013-14.

Indian Railways launched a new tourism product i.e. theme based tourist circuit train – 'Bharat Gaurav' to showcase India's rich cultural heritage and magnificent historical places.

In the Union Budget 2022-23:

The government allocated Rs. 140,367.13 crore (US\$ 18.40 billion) to the Ministry of Railways.

Indian Railways will develop new products and efficient logistics services for small farmers, and small and medium enterprises. It will also take steps towards integration of postal and railway networks to provide seamless solutions for movement of parcels.

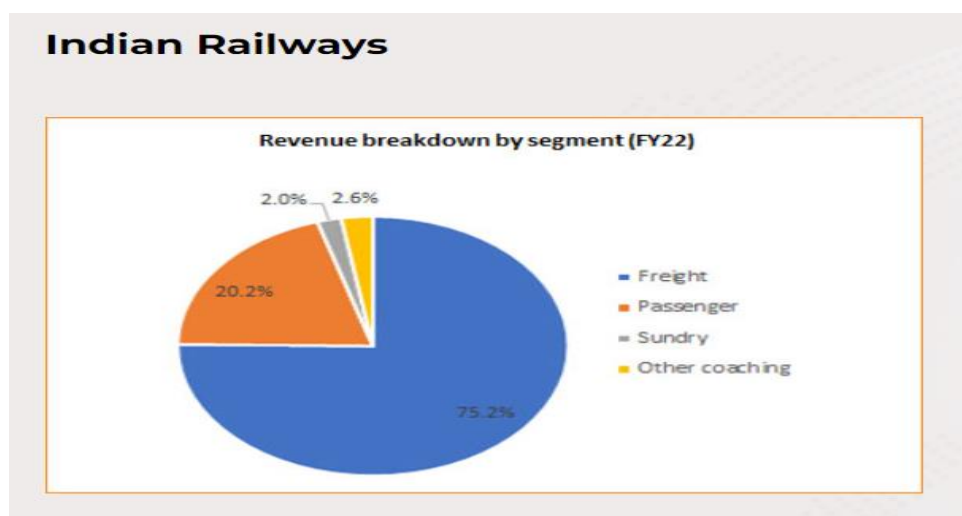

100 PM-Gati Shakti Cargo Terminals for multimodal logistics facilities will be developed over next three years.

## ROAD AHEAD

Indian Railway network is growing at a healthy rate. In the next five years, Indian railway market is expected to be the third largest, accounting for 10% of the global market. The government has announced two key initiatives for seeking private investments—running passenger trains by private operators across the railways network and redevelopment of railway stations across the country. According to Indian Railways, these projects have the potential of bringing an investment of over US\$ 7.5 billion in the next five years.

‘Adarsh’ Station Scheme has been started since 2009-10 and presently, railway stations are upgraded/onetizing based on identified need of providing better enhanced passenger amenities at stations. Under the scheme, 1,253 stations have been identified for development, out of which 1,215 stations so far have been developed. The remaining 38 stations are planned to be developed by 2022-23. Indian Railways is also looking at other areas of revenue generation such as the following: a) Change in composition of coaches so that it can push the more profitable AC coach travel; b) Additional revenue streams by onetizing traffic on its digital booking IRCTC; and c) Disinvesting IRCTC.

## INDIA RAIL FREIGHT TRANSPORT MARKET ANALYSIS

The size of the India air freight market is estimated at around USD 15 billion in the current year and is anticipated to register a CAGR of over 4% during the forecast period. The Rail Logistics project will assist India in diverting more traffic from the road to the rail, improving the efficiency of freight transportation while lowering annual GHG emissions by millions of tonnes. Additionally, the project will encourage more private-sector investment in the railroad industry.

The fourth-largest rail network in the world, Indian Railways (IR), moved 1.2 billion tonnes of freight during the fiscal year that ended in March 2020. However, just 17% of India’s freight is moved by rail; 71% of it is conveyed by road. Volumes have been constrained, and shipping speeds and reliability have suffered due to IR capacity restrictions. Since trucks have been gaining market share throughout the years, IR has been losing market share; in 2017–18, its market share was 32%, down from 52% a decade earlier.

Road freight accounts for about 95% of the freight sector’s emissions, making it the biggest source of GHG emissions. Additionally, trucks were involved in 15.8% of all fatal road transport-related accidents and 12.3% of all traffic fatalities in 2018. Rail emits about one-fifth of the GHG emissions from trucks. With IR expecting to become a net-zero carbon emitter by 2030, rail has the ability to reduce 7.5 million tonnes of carbon dioxide and other greenhouse gases annually.

### India Rail Freight Transport Industry Segmentation

From a point of loading or a goods station to a point of unloading, goods are transported by rail. These products, such as coal, building supplies, iron, and steel, are frequently large and heavy. Along with the transportation of large items, the rail freight market also offers this service. Service providers provide value-added services and logistics. Loading and documentation, unloading, services, and packaging are a few of them. A complete background analysis of the India Rail Freight Transport Market, including the assessment of the economy and contribution of sectors in the economy, market

overview, market size estimation for key segments, and emerging trends in the market segments, market dynamics, and geographical trends, and COVID-19 impact, is covered in the report.

The India Rail Freight Transport Market is Segmented by Cargo Type (Containerized (Intermodal), Non-containerized, and Liquid Bulk), Destination (Domestic and International) and Service Type (Transportation and Services Allied to Transportation). The report offers market size and forecasts for India Rail Freight Transport Market in value (USD Billion) for all the above segments.

### India Rail Freight Transport Market Trends

This section covers the major market trends shaping the India Rail Freight Transport Market according to our research experts:

Digitization in Railways have increased the dependency on rail freight transport

In the railway sector, AI has a wide range of uses, including asset management, proactive maintenance, and emergency notification. Neural networks and deep learning algorithms help schedule trains more efficiently and cut down on delays. Additionally, cutting-edge passenger information systems enhance transportation services and raise customer satisfaction.

The Train Brain, a Swedish firm, creates AI algorithms to increase the dependability of public transportation. The startup's technology offers real-time traffic simulations, reporting, and delay forecasting. To forecast the rail network, the technology analyses data from GPS or signaling systems as well as train timetables. The Train Brain enables passengers to better-educated commute or trip plans and rail operators to make data-driven traffic planning decisions.

Cedar AI, a US-based firm, provides artificial intelligence solutions to assist rail operators in increasing yard productivity. The startup's AI-powered technology interfaces with current software to guarantee observance of safety regulations while operating the rail yard. The platform assists rail operators in streamlining yard operations, reducing workload, and enhancing the safety of train handling. Thus, digital development provides a unique edge for railways not just to stay relevant, but also to increase their share in the overall logistics market in India.

### Freight Structure

There was no increase in freight in 2021-22. However, various initiatives were taken during this period which includes Round trip charging for ultra lead(<50KM) container traffic, e-RD-provision of single OTP for a day, e-RD-Submission of Letter of Credit (LC) in case of goods traffic pertaining to Bangladesh, Rail Green Point (Carbon saving while transportation by Rail), etc. Indian Railway has permitted transportation of Liquid Medical Oxygen (LMO) in cryogenic tankers under Roll on-Roll off scheme utilizing DBKM/ BOM, BRN etc. as a special case. Class of charge for truck/tanker will be LR3 and in respect of payload including gas the charge shall be class be class 120 under train load. In case of wagon load, the charge will be 10% more than train load. Guidelines have also been issued for movement of Liquid Medical Oxygen in containers in containers by Container Train Operators. Haulage Charge will be levied on 'Haulage rate per TEU(FAK)' basis. No haulage charge will be levied for empty flats in the rake.

### Freight Marketing:

1. **Gati Shakti Multi Modal Cargo Terminal (GCT):** Indian Railways has launched a new 'Gati Shakti Multi Modal Cargo Terminal (GCT)' policy on 15.12.2021. The objective of the policy is to boost investment from industry in

development of additional terminals for handling rail cargo. These terminals will be constructed on non-Railway land, as well as partially or fully on Railway land. All new upcoming terminals shall be commissioned as GCT.

2. **Development of Goods Shed through private investments:** For development of Goods shed at small/roadside stations through private investment a policy was issued on 14.10.2020. The policy aims to augment terminal capacity through private participation by allowing setting up of new goods sheds facilities and developing existing goods sheds.
3. **Procurement of rakes for freight traffic by inviting private investments:**
  - i. **General Purpose Wagon Investment Scheme (GPWIS):** To allow investment for procurement of General Purpose Wagons by End users, Public Sector Undertaking (PSUs), Port Owner, Logistics Providers and Mines Owners. The scheme permits eligible investors to invest in minimum of one rake of general-purpose wagon in any of the desired circuit(s) to carry any commodity in these rakes.
  - ii. **Liberalized Special Freight Train Operators (LSFTO) Scheme:** Liberalized Special Freight Train Operators (LSFTO) Scheme has been started in the year 2020 by amalgamating erstwhile two schemes viz. Liberalized Wagon Investment Scheme (LWIS) and Special Freight Train Operator (SFTO) Scheme. The objective of the policy is to increase Railways share in transportation of non-conventional traffic in high capacity and special purpose wagons to increase the commodity base of Rail Traffic. This policy provides an opportunity to logistics service providers or manufacturer to invest in wagons and use advantages of rail transport of selected commodity to create a win-win situation for railways and themselves. This also creates an avenue for end users to optimally utilize their rolling stock by transporting their commodities as well as commodities of third party.
  - iii. **Automobiles Freight Train Operator (AFTO) Scheme:** Automobile Freight Train Operator Scheme permits procurement and operation of special purpose rakes by private parties for transportation of automobiles sector.
  - iv. **Wagon Leasing Scheme (WLS):** The Scheme introduced the concept of leasing of railway wagons on Indian Railways. The scheme aims at induction of rakes of general-purpose wagons, special purpose wagons and wagons for containers movements through PPP route. Wagon Leasing Companies can lease wagon under Automobiles Freight Train Operator (AFTO) scheme, General Purpose Wagon Investment Scheme (GPWIS), Liberalized Special Freight Train Operators (LSFTO) scheme, Automobiles Freight Train Operator (AFTO) scheme and also to Container Train Operators.

### FOUNDRY MARKET ANALYSIS FORECAST 2023-2027

The India foundry market size is estimated to grow at a CAGR of 10.77% between 2022 and 2027. The market size is forecast to increase by USD 15,684.57 million. The growth of the market depends on several factors, including a focus on technology upgrades, make-in-India initiatives, and increasing confidence within the foundry industry.

This foundry market report in India extensively covers market segmentation by end-user (automotive, electrical and construction, industrial machinery, agriculture, and others) and type (gray iron casting, non-ferrous casting, ductile iron casting, steel casting, and malleable casting). It also includes an in-depth analysis of drivers, trends, and challenges. Furthermore, the report includes historic market data from 2017 to 2021.

## What will be the Size of the Foundry Market in India During the Forecast Period?

### Key Foundry Market Driver in India

Focus on technology upgrades is notably driving the India Foundry Market growth. India is one of the leading countries in the market. The main reason for this is the increasing demand for metal castings from the automotive sector. In 2022, India produced approximately 22.9 million vehicles, including commercial vehicles, passenger cars, tricycles, and two-wheelers. This has increased the demand for the auto parts needed to manufacture automobiles. To meet the growing demand for metal castings in India, foundries are investing in new technology and equipment.

The automotive sector saw a significant increase in sales in 2022 compared to 2021, with 13.63%. Similarly, motorcycle sales increased by 4.7% in 2022 compared to 2021. The automotive sector has declined to some extent due to rising vehicle prices. Indian foundries are therefore expected to benefit from technology upgrades in multiple ways, including low power consumption, improved production efficiency, higher utilization rate, and higher profit margin. Such factors are anticipated to propel the growth of the market during the forecast period.

### Major Foundry Market Challenge in India

The lack of highly skilled manpower is challenging the India foundry market growth. Foundries in India lack skilled workers such as foundry engineers, pattern makers, and maintenance electricians. Technology upgrades require investment in training facilities to educate employees on various aspects, such as Different molding methods, patterns, casting methods, and different furnace techniques. Organized, modern training facilities and the creation of regular qualification programs help foundries to use advanced technology in their foundries.

Currently, most of the workforce is opting for managerial, clerical, and managerial positions. Over 90% of Indian foundries are MSMEs, whose managers often perform functions that large foundries outsource to skilled workers. To increase utilization rates, foundries in India invest in expert technicians specifically tailored to the task, including pattern makers, hand core makers, shapers, machine core makers, primary sand technicians, and metallurgical assistants. Unless this is achieved, the full potential of the market will not be realized. Such factors are anticipated to hinder the growth of the market during the forecast period.

#### **National Environmental Policy, 2006**

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better

livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

1. Conservation of Critical Environmental Resources
2. Intra-generational Equity: Livelihood Security for the Poor
3. Inter-generational Equity
4. Integration of Environmental Concerns in Economic and Social Development
5. Efficiency in Environmental Resource Use
6. Environmental Governance
7. Enhancement of resources for Environmental Conservation.

**PHASED IMPLEMENTATION OF UPI FOR BIDS BY RETAIL INDIVIDUAL BIDDERS AS PER THE UPI CIRCULAR**

SEBI has issued circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 dated June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019, circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 and circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

**Phase I:** This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six working days.

**Phase II:** This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six working days during this phase.

**Phase III:** The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

<b>Bid Quantity</b>	<b>Bid Amount (₹)</b>	<b>Cumulative Quantity</b>	<b>Subscription</b>
500	24	500	16.67%

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2) / 2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015, as updated from time to time by RBI and Master Direction – Foreign Investment in India (updated up to March 08, 2019). In terms of the Master Circular, an Indian company may issue fresh shares to people resident outside India (who is eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular and Master Direction. The Indian company making such fresh issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for issue of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Section 4 of the FDI Policy 2020 has to be obtained. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time. Investors are advised to confirm their eligibility under the relevant laws before investing and / or subsequent purchase or sale transaction in the Equity Shares of our Company. Our Company, the Underwriters and their respective directors, officers, agents, affiliates, and representatives, as applicable, accept no responsibility or liability for advising any investor on whether such investor is eligible to acquire Equity Shares of our Company.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that

- (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations;
- (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and
- (iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an

entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Issue in writing about such approval along with a copy thereof within the Issue Period.
